# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

June 30, 2015

## **Note 1. Reporting Entity**

The *Instituto Costarricense de Electricidad* (Costa Rican Electricity Institute) and Subsidiaries (hereinafter “ICE Group”) is an autonomous Costa Rican entity organized under Executive Order No. 449 of April 8, 1949 and Law No. 3226 of October 28, 1963. The address of its registered office and main domicile is Sabana Norte, Distrito Mata Redonda, San José, Costa Rica.

Its main activity consists of developing energy-producing sources existing in the country, as well as the supply of electricity, with the exclusive right to generate, transmit, and distribute electricity in Costa Rica, except for a small number of authorized private companies, municipal entities, and rural cooperatives. Also, ICE Group holds a concession to develop and promote telecom services in Costa Rica and, until 2010, had the exclusive right to operate and provide mobile telecom services in the country. ICE Group offers a wide range of integrated telecom services, including fixed and mobile telecom and data transmission services (broadband access and value-added services).

Such activities are regulated by the General Comptroller of the Republic, the General Superintendence of Securities (SUGEVAL), the National Stock Exchange of Costa Rica, the Law for the Regulation of the Securities Market, the Regulatory Authority for Public Services (ARESEP), the Telecommunications Superintendence (SUTEL), and the Pensions Superintendence (SUPEN).

A significant portion of these activities has been financed through funds provided by banks, as well as through the issuance and placement of debt bonds (Bonds) in the local and international market and through the National Stock Exchange of Costa Rica.

ICE Group is a group of government-owned entities, including the *Instituto Costarricense de Electricidad* (ICE, parent company and ultimate controlling entity) and its subsidiaries, *Compañía Nacional de Fuerza y Luz, S.A.* (C.N.F.L.), *Radiográfica Costarricense, S.A.* (RACSA), *Compañía Radiográfica Internacional Costarricense, S.A.* (CRICSA), and *Cable Visión de Costa Rica S.A.*

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- Compañía Nacional de Fuerza y Luz, S.A

La Compañía Nacional de Fuerza y Luz, S.A. (hereinafter, CNFL) is a corporation created under Law Number 21 of April 8, 1941, referred to as “Electrical Contract”, amended by Law Number 4977 of May 19, 1972 and current until August 8, 2008. Accordingly, CNFL is subject to the regulations established by CGR, Articles 57 and 94 of Law No. 8131 "Public Administration and Budgets," ARESEP, and the framework of the General Internal Control Law and the Law against Corruption and Illicit Enrichment, among others. The main objective is to provide energy services to the domestic market.

- Radiográfica Costarricense, S.A.

Radiográfica Costarricense, S.A. (hereinafter RACSA) is a mixed corporation established on July 27, 1964 under the laws of the Republic of Costa Rica, owned by *Instituto Costarricense de Electricidad* and *Compañía Radiográfica Internacional Costarricense, S.A.* (proportional interest of 50%). It was created through Law Number 3293 of June 18, 1964. It is regulated by the provisions contained in the Executive Decrees Number 7927-H and 14666-H of January 2, 1978 and May 9, 1983, respectively, contained in the Civil and Commerce Codes.

RACSA’s main objectives are the development of telecom services in Costa Rica, national connectivity and the Internet, international connectivity for data and video transmission, information services, data center, and others.

- Compañía Radiográfica Internacional Costarricense, S.A.

Compañía Radiográfica Internacional Costarricense, S.A. (hereinafter, CRICSA) was organized through Law No. 47 of July 25, 1921 and its main objective is the operation of the concession relating to wireless communication. CRICSA does not currently have any officers or employees because ICE Group provides its accounting and administrative services.

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

- Cable Visión de Costa Rica S.A.

Cable Visión de Costa Rica, S.A. (CVCRSA) is a corporation domiciled in Moravia, San José, Republic of Costa Rica and is wholly-owned (100% ownership interest) by ICE since December 5, 2013. CVCRSA was organized on January 19, 2001 and its main activity is providing cable television services; subsequently, the subsidiary added Internet and digital signal services to the activities offered. With the acquisition of this entity, ICE will be able to provide Triple Play services.

### Composition of Capital

According to article 16 of the Law Organizing the Entity, ICE's capital is comprised of the following:

- National revenue that the law allocates and earmarks for ICE.
- Rights acquired from the Municipality of San Jose under the Local Streetcar Agreement.
- Any other government-owned assets transferred to ICE.
- The country's water resources, which have already been or will be declared to be a national resource and any accumulated profits resulting therefrom.

### **Note 2. Basis of Preparation**

#### (a) Statement of Compliance

The accompanying consolidated financial statements have been prepared in accordance with the accounting principles included in ICE's Accounting Policy Manual (version 5) accepted by the National Accounting Department of the Ministry of Finance of the Republic of Costa Rica—the Lead Agency of the National Accounting Subsystem. ICE's Accounting Policy Manual includes the accounting policies applicable to booking transactions. Such policies were formally prepared and issued using “accounting criteria” with the stewardship and binding criteria of the Budget Accounting Directorate, the approval of the Corporate Management and Finance Department, and acceptance of the National Accounting Department of the Ministry of Finance.

The above set of rules considers the conceptual framework included in the Accounting Principles Applicable to the Costa Rican Public Sector, as well as supplemental application of International Financial Reporting Standards (IFRSs) under the following conditions:

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- A supplementary use of the standard is given by exception, meaning that this situation is not normal or usual.
- If and only if it is expressly stated in ICE's Manual of Accounting Policies. This means that its application is allowed only if the applicable IFRS to be used is explicitly and specifically contained in the manual.

Pursuant to regulations issued by the National Accounting Office of the Ministry of Finance and laws in effect, ICE may use the Accounting Principles Applicable to the Costa Rican Public Sector, set forth in Executive Order No. 34460-H of February 14, 2008, or the regulatory framework it has been applying thus far, until ICE transitions to IFRSs on December 31, 2013. However, through Decree No. 38069-H published on December 20, 2013, the National Accounting Office of the Ministry of Finance extended the term for transitioning to IFRSs to the accounting period beginning on January 1, 2016, therefore, 2015 would be the transition year to the International Financial Reporting Standards (IFRSs).

Moreover, in accordance with article 8, Transition Provision III of Executive Order No. 35616-H issued by the National Accounting Office and published in Official Gazette No. 234 of December 2, 2009, which reads as follows:

*“Until the International Financial Reporting Standards are permanently implemented, each government-owned agency included in the scope of this Decree, under the leadership of the National Accounting, must continue to apply the Accounting Principles Applicable to the Costa Rican Public Sector, set forth in the Executive Decree Number 34460H of February 14, 2008, or the legal framework that has been applied.”*

As it has been set forth by ICE Group, regarding the accounting standards, the common practice is that supplementary use is expressly contained in the standard, in detail, indicating the hierarchy of the accounting standard sources applicable to regulated materials that must be observed when matters not anticipated in ICE's Manual of Accounting Policies.

Management of ICE Group authorized the issue of the consolidated financial statements and notes thereto on June 28, 2015.

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### (b) Basis for Measurement

Transactions are initially booked on the historical cost basis according to Executive Order No. 34460-H of February 14, 2008. However, as of the date of issue of the accompanying consolidated financial statements, some items will be valued using other bases for measurement as detailed in ICE's Manual of Accounting Policies (version 5).

### (c) Functional and Presentation Currency

ICE Group's accounting records, as well as the consolidated financial statements and their respective notes, are expressed in Costa Rican colones (¢), currency of the Republic of Costa Rica and functional currency for ICE Group.

All the financial information contained in this document is presented in millions of colones, except otherwise indicated in some notes contained in the consolidated financial statements, which refer to the currency of origin for those transactions.

### (d) Use of Estimates and Judgments

The preparation of the attached consolidated financial statements, according to ICE's Manual of Accounting Policies (version 5) and accepted by the National Accounting Department of the Ministry of Finance of the Republic of Costa Rica, requires that Management makes judgments, estimates, and assumptions that affect the application of policies and amounts of assets, liabilities, income and expenses reported.

The relevant accounting estimates and assumptions were reviewed on a recurrent basis. The changes arising from new information or new events are adjusted affecting the results of the period in which the estimate is reviewed and in any other future period that is affected.

#### (i) Judgments

The information on judgments used for the application of accounting policies with a significant effect on the amounts reflected in the consolidated financial statements is described in:

- Note 39 – Contingent assets and liabilities.

(Continues)

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### (ii) Assumptions and uncertainty in the estimates

The information on assumptions and uncertainty in the estimates that have the significant risk of a material adjustment in the year ended December 31, 2015, is included in the following notes:

- Note 10 – Allowance for doubtful accounts.
- Note 11 – Allowance for obsolete inventory.
- Note 39 – Recognition and measurement of provisions and contingencies.

### **Note 3. Significant Accounting Policies**

The following accounting policies, set forth in ICE's Accounting Policy Manual (Version 5) effective for 2014, have been consistently applied in the years presented these interim consolidated financial statements by all the entities of ICE Group corresponding to the quarter ended on June 30, 2015, are the same ones applied by ICE Group in preparing their consolidated financial statements as of December 31, 2014 and for the year then ended, except for the ones detailed below:

#### (a) Annual Accounting Policies Not Applied for Interim Periods

ICE Group's accounting policies contain a series of guidelines that govern the Group's accounting practices and that consider the accounting treatment of an accounting period, which in the case of ICE Group's corresponds to a calendar year from January 1 to December 31.

Some of the accounting policies must be applied for the annual period, as set forth in the guidelines, given the complexity of the implicit monthly or quarterly processing for the calculation or restatement of values.

Below is a list of accounting treatments of interim periods which differ from the annual treatment conducted as of the closing date of each accounting period.

#### (i) *Asset Revaluation:*

ICE Group's accounting policies regarding asset revaluation indicate that the restatement of asset values and their respective depreciation are carried out on an annual basis; therefore, the enclosed interim consolidated financial statements do not include revaluations made after the last annual period presented.

The balances of operating assets and other operating assets and their respective accumulated depreciations with a cut-off date as of December 31 last year, are revalued on an annual basis using the ratios established by ICE Group for each significant type and component of

(Continues)

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

the assets, except for the assets of the Telecommunications Sector indicated as "not subject to revaluation." If the variations in the values resulting from such revaluations are insignificant, such frequent revaluations are deemed unnecessary and are not recorded; or they are done every three or five years. The revaluation is done as of the second accounting period according to its recording date, using independent accounts of revalued cost and revalued accumulated depreciation.

In the cases in which pursuant to the expert criteria, revaluations are deemed unnecessary, but due to the policies set forth above, the assets were revalued, the competent technical areas must conduct a study to define if it keeps or adjusts the value of the assets.

Moreover, the adjustments made for the allowance for asset revaluation in favor of the development allowance, resulting from the depreciation of revalued assets, are made as part of the year-end procedures and are not done in interim periods.

### (ii) *Allowance for Valuation of Stock at Warehouses:*

According to the policy on the allowance for valuation of stock, the amount of the allowance for valuation of stock - an operation that must be periodically reviewed to cover the eventual obsolescence, impairment, or shortage.

The necessary activities to review the allowance involve all offices of ICE Group since inventories are safeguarded in the entire country, and additionally, they take place every year. Thus, based on practical reasons, allowance is reviewed or modified only at yearend.

Some notes to the consolidated financial statements present, for practical purposes, detailed information per subsidiary.

### (b) Consolidation Bases

#### (i) Business Combinations

ICE Group's business combinations are accounted for using the acquisition method on the acquisition date, which is the date on which control is transferred to ICE Group. Control is the power to govern the financial and operating policies of the acquiree so as to obtain benefits from its activities.

Transaction costs directly attributable to the acquisition process are recognized as part of the value of the investment.

Goodwill is measured at cost based on the financial statements of the acquiree on the acquisition date and considering the following:

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- The value of consideration transferred by the Group’s entity (acquirer); less,
- The equity (carrying amount) of the acquiree at the acquisition date after the items with higher materiality levels have been aligned in accordance with the parent company’s accounting policies.

“Goodwill” arises from the acquisition of subsidiaries and represents the excess of the acquisition cost over the carrying amount (net equity) of the acquiree, it is recognized under “Intangible assets” in ICE Group’s consolidated financial statements. Goodwill is systematically amortized (straight-line) to expenses over the term it is expected to generate income. The amortization period is determined based on financial criteria in accordance with expectations of obtaining the expected benefits from the business.

“Goodwill” is recognized at cost less accumulated amortization.

(ii) Subsidiaries

The consolidated financial statements include the accounts of *Instituto Costarricense de Electricidad* (ICE) and its subsidiaries. The accounts are detailed below:

| <b>Subsidiaries</b>   | <b>Country</b> | <b>Percentage of Participation</b> |                      |
|---|----------------|------------------------------------|----------------------|
|   |                | <b>up to June, 31</b>              | <b>up to Dec. 31</b> |
|   |                | <b>2015</b>                        | <b>2014</b>          |
| Compañía Nacional de Fuerza y Luz (CNFL)                          | Costa Rica     | 98,6%                              | 98,6%                |
| Compañía Radiográfica Internacional Costarricense, S.A. (CRICRSA) | Costa Rica     | 100%                               | 100%                 |
| Radiográfica Costarricense, S.A. (RACSA)                          | Costa Rica     | 100%                               | 100%                 |
| Cable Visión de Costa Rica S.A. (CVCRSA) <sup>(1)</sup>           | Costa Rica     | 100%                               | 100%                 |

Subsidiaries are those enterprises controlled by ICE (parent company). The financial statements of the subsidiaries are included in the consolidated financial statements from the date that control starts until the date that control ceases. When necessary, the accounting policies of the subsidiaries have been revised to align them with the policies adopted by ICE Group.

(1) On December 5, 2013, ICE acquired all of the shares (100%) of Cable Visión de Costa Rica, S.A. (CVCRSA), which is dedicated to providing cable television services. ICE presents consolidated financial statements starting in 2013.

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements

*(In millions of colones)*

Depreciation percentages used for the current period and the comparative period for operating assets, other operating assets under financial lease are based on the estimated useful life for each category of assets:

|                                    | <b>Useful life<br/>(in years)</b> |
|------------------------------------|-----------------------------------|
| Buildings                          | 40 - 50                           |
| Operating assets - ICE Electricity | 20 - 40                           |
| Operating assets - ICE Telecom     | 3 - 40                            |
| Machinery and equipment            | 1- 20                             |

The depreciation method, useful lives, and the residual values are reviewed in each reporting date and adjusted, if appropriate.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Below is a description of the nature of assets under financial lease recorded by ICE Group:

(1) Assets under Financial Lease

On January 29, 2010, Banco de Costa Rica (BCR) and ICE agreed to create a “Securitization Trust”, which involved execution of a trust agreement whereby ICE acts as the trustor and beneficiary and BCR is named as the trustee.

Currently, the trust is authorized to issue public debt and has booked liabilities therefor as of June 30, 2015 and as of December 31, 2014, it recorded liabilities for this concept. The trust, as the owner of “Centro Empresarial La Sabana” and office furniture and equipment within that property, leases such property to ICE for a 12- year term, at the end of which ICE may exercise a purchase option for US\$1 (one U.S. dollar). ICE has classified this lease as a finance lease. In accordance with ICE Group’s accounting policies, this trust is not required to be included as an entity in the separate financial statements of ICE Group.

The main clauses contained in the Securitization Trust are summarized as follows:

- The objectives of the trust are:
  - a) Acquire the products and services necessary for the operation and maintenance of the building object of the contract, according to the purchasing plans provided by the Trust, as applicable.
  - b) Lease the equipped building to ICE, manage the cash flows to repay financing and provide preventive and corrective maintenance to the facilities, under the agreed terms.
  - c) Become a vehicle to issue and place securities, pursuant to the conditions and characteristics set forth in the issuance prospect and the current contract, upon prior authorization of the General Superintendence of Securities (SUGEVAL), regulatory entity for the issuance of debt securities. Issuance and placement of the securities may be performed at different intervals, according to payment, terms and conditions projected. Also, it may execute credit contracts to obtain the necessary resources for financing, in accordance with the financial conditions present in the market.
- With the amount received by the Trust for the lease of the property, the loan and yields from the securities placed in the stock market will be paid, as well as those private securities issued, and national and international bank loans.
- The term of this Trust will be of 30 years.
- The Trust’s assets will be used solely and exclusively to comply with and accomplish the objectives of the Trust agreement.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Below is a description of the nature and main works in progress during the period:

(1) Reventazón Hydroelectric Project

This project is located in the middle basin of the Reventazón River, in Limón, Costa Rica, with electric generation capacity of 305 MW. The trust and construction agreement was already signed and authorized by the Office of the Comptroller General, and it is in effect. The project is financed with ICE's funds and with funds from other financing schemes subscribed by ICE.

(2) Cachí Hydroelectric Project

This project uses the water of the medium basin of Reventazón River. The powerhouse is located 4km south of Juan Villas in the district of Tucurrique, canton of Jiménez and the reservoir and dam are located in the district of Cachí, in the canton of Paraíso, both in the province of Cartago.

The works consist of the expansion of the current engine room, construction of an additional tunnel that will provide the plant with an additional power output of 20 MW, a surge tank, and two inspection openings.

Below is a description of the nature of the main long-term investments:

They mainly correspond to investments in bonds and securities with returns ranging from 6.67 % and 11.13 % per annum for investments in colones and 4.70% and 5.85% per annum for investments in dollars (between 6.67% and 11.13% per annum in colones and 4.70% and 5.50% per annum in dollars in 2014). Investments amounted to ¢51.590 in colones and ¢1.071 in dollars (equal to US\$2) (¢38,174 denominated in colones and ¢1.081 in dollars, equal to US\$2 in 2014), with a maturity between November 2015 and April 2028 (February 2015 and July 2023 in 2014).

(1) Toro 3 Hydroelectric Power Project Trust

On March 9, 2006, ICE and JASEC subscribed a business partnership agreement for the joint construction of the Toro 3 Hydroelectric Power Project whereby both entities will have equal participation (50% each) in respect of rights and obligations, with the purpose of designing, financing, constructing, operating, and maintaining such project. In January 2008, under the business partnership agreement, ICE and JASEC subscribed a Trust agreement with BCR whereby ICE and JASEC act as trustors and beneficiaries and BCR is named as the trustee. The purpose of the trust is the independent generation and management of the necessary financial resources to build the Toro 3 Hydroelectric Power Project. In addition, the trust will construct the project within the established term, lease the plant to ICE and JASEC, purchase the required construction goods and services, provide maintenance services, and

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

manage the cash flows to repay the financing and make timely payments in relation thereto (see note 30). The trust agreement is for a term of 30 years.

On January 26, 2012, the trustors (ICE and JASEC) subscribed an addendum to the aforementioned trust agreement, whereby both entities agree to provide at least 20% of the resources necessary to finance Toro 3 Hydroelectric Project, so that the trust obtained the necessary funds to finance the remaining amount. In accordance to the addendum, ICE made an in-kind contribution (construction materials and labor), equal to ¢11,203. This contribution accounts for 10% of the resources necessary to finance Toro 3 Hydroelectric Project; the remaining 10% required to comply with the provisions contained in the addendum, was provided by JASEC.

On January 26, 2012, ICE, JASEC, and the Toro 3 trust subscribed a lease agreement for the Toro 3 Hydroelectric Power Project, with the following characteristics:

- Lessor: Toro 3 trust, represented by Banco de Costa Rica (BCR).
- Lessees: ICE and JASEC
- Term: one hundred and thirty-seven months from June 1, 2013, which is the starting date of the lease.
- Transfer: Upon expiration of the lease agreement, the lessors (JASEC-ICE) may exercise a purchase option for the power project.

#### (2) Empresa Propietaria de la Red, S.A.

ICE Group holds an ownership interest in Empresa Propietaria de la Red, S.A. (EPR), which was selected to execute the Sistema de Interconexión Eléctrica de los Países de América Central [Central American Electric Interconnection System] (SIEPAC) Project. This investment is jointly made by ICE Group with the other entities in charge of energy management in the six Central American countries and three additional entities located in Spain, Colombia and Mexico. Each of the nine countries has an interest of 11.11%, and no country shall have an interest in EPR in excess of 15%.

EPR's share capital is comprised of 58,500 ordinary shares of US\$1.000 (one thousand dollars and no cents) par value each; ICE owns 6.061 shares of US\$1.000 (one thousand dollars and no cents) par value and CNFL owns 439 shares of US\$1.000 (one thousand dollars and no cents) par value each, respectively, for a total of US\$6,5 million equivalent to ¢3.124 for ICE Group. The shares are valued at acquisition cost.

In June 2015 and 2014, the EPR made payments to ICE Group for returns on investments (see note 35).

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### (3) Red Centroamericana de Fibras Ópticas, S.A. - Nicaragua

In 2013, ICE Group acquired ownership interest in Red Centroamericana de Fibras Ópticas S.A. (REDCA S.A.), which is dedicated to developing, financing, constructing, operating, and commercially exploiting and providing maintenance to telecom services or services related to IT and communications. REDCA's share capital consists of 2,700 of US\$1,000 (one thousand dollars and no cents) par value each, and the Group owns 300 shares, of which 93.24% are owned by ICE and 6.75% by CNFL. Currently, this Company is not commercially operational.

### (4) Tecomunica, S.A. - Nicaragua

ICE and ENATREL agreed to organize a company in Nicaragua to sell and commercialize telecom services and each company will contribute US\$1 million; this company is referred to as Tecomunica, S.A.

In February 2015, a capital contribution for a total of US\$200,000 (two hundred thousand dollars and no cents and equal to ¢108) was made. In May 2015, another investment in equipment was made amounting to ¢147, for a total as of June 2015 of ¢255.

**Valuation of Investments**

The accounting treatment of short-term investments is performed according to the analysis of each instrument, which involves the determination of nominal values, interests, premiums, discounts, and transaction costs. These last items, as with the premiums and discounts, are amortized according to the effective interest method.

The available-for-sale investments are valued at the market price, using the price vector from the company *Provedor Integral de Precios Centroamérica* (PIPCA), and the effect of valuation at market price for the investments available for sales are included in the equity section, in the account called “Results of the Valuation of Financial Instruments,” until the moment in which the instrument is written off.

As of June 30, 2015 and as a result of the valuation of the short-term investments, ICE recognized a net unrealized gain for the sum of ¢740 (¢599) in 2014), which is presented as part of the entry “Results of the Valuation of Financial Instruments”, in the equity section 1.

(1) Loan to autonomous entities

911 Emergency System

Through an inter-institutional agreement between ICE and the 911 emergency system, the “Agreement to Pay Accounts due from the 911 Emergency System to ICE” was subscribed on December 21, 2012. In this agreement, the debt was expressly acknowledged and accepted and a “payment arrangement” was formally subscribed by the 911 emergency system to settle such debt. As of as of June 30, 2015 the balance of the debt was ¢4.565 (¢4.565 in 2014).

In accordance with the long-term note due to ICE, the payment arrangement is for a term of 10 years starting January 1, 2013 and the liability is payable by the 911 emergency system in 16 half-yearly installments. A two-year grace period was established for payment of principal and interest. The first payment is due on January 1, 2015, while the final payment is due on July 1, 2022. The loan bears interest at the base deposit rate of BCCR in effect the week preceding the payment date.

Currently, the original agreement is under a negotiation process to extend the recovery term so that ICE can process the corresponding collection formalities.

Empresa Propietaria de la Red

It corresponds to the loan agreement entered into ICE and Empresa Propietaria de la Red (EPR) to repay loan IDB No. 1908 for a total of US\$4.5 million, equivalent to ¢2.414 (¢2.440 in 2014). The total debt term is 25 years as of November 24, 2010, with a 5-year grace period, paid on a semiannual basis, at a variable interest rate (as of 2014, Libor 3-month rate of 0,23%, plus a funding margin of 0.04%, plus a IDB loan margin of 0.85%).

(1) Use agreements

On November 5, 2007, ICE and BCR (trustee) subscribed a lease agreement under a Securitization Trust for construction of a thermal power plant called Garabito Thermal Power Plant (see note 28). The lease term of the aforementioned thermal power plant according to that trust is 142 months (11 years and 10 months) starting June 2010. Since the plant did not start commercial operations on the anticipated date (June 2010), management of the Executing Unit of the Garabito Thermal Power Plant and ICE agreed on November 19, 2010 that ICE would begin to amortize prepaid expenses starting January 2011 corresponding to lease payments made by ICE from June to December 2010, applying the first payment (made in June 2010) in January 2011 and so on until March 2022, which is the expiration date of the lease agreement.

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

After March 2022, ICE may continue to use the asset for seven months additional to those set forth in the agreement.

### (2) Fuel

In 2012, the Public Services Regulatory Authority (ARESEP), according to Resolution 977-RCR-2012 of November 2, 2012, partially approved the request filed by ICE for the recognition through rate adjustments of fuel and additional expenses for the first half of 2012. Those expenses for a total of ¢19,225, were not recognized in the rate approved in ARESEP's prior ruling. Of that amount, ICE recovered ¢3,765 while the outstanding amount of ¢15,460 corresponds to lags in the recognition of fuel and expenses in 2012. According to ARESEP's Resolution No. RJD-003-2013 issued on February 25, 2013, said delays must be recognized by means of rate adjustments no later than July 1, 2013, in quarterly payments. According to resolution 795-SJD-2013/125269 of November 29, 2013, ARESEP accepts the request of ICE of carrying forward the delay for fuels of 2012 approved for the first and second quarter of 2014 through agreement of April 14, 2013, to be applied to the rates of the third and fourth quarter of 2014, when the aforementioned balance was amortized. The balance pending of recognition as of December 31, 2013 amounted to ¢7,877.

ARESEP issues resolution RIE-034-2014 of June 27, 2014, through which it approved the recognition through rate adjustments of the exchange rate difference between the estimated versus actual fuel expenses for February, March, and April 2014 for the sum of ¢37,167. ARESEP accepted ICE's request so that such recognition be made in quarterly installments, as follows: in the third quarter of 2014, the sum of ¢16,360 will be recognized; in the fourth quarter of 2014, the sum of ¢7,916 will be recognized, and the rest will be recognized in equal parts during the quarters of 2015. The outstanding balance as of as of June 30, 2015 of this recognition is ¢6,445 (¢12,891 as of December 2014).

### (3) Imports

As of September 2014, according to resolution RIE 061-2014 of ARESEP, rate recognition for energy import expense is approved, for a sum of ¢31.045. According to this resolution and ICE's accounting policies, such amount will be deferred within the next fifteen months commencing on October 1, 2014, so that it is associated with the income that will be obtained in this term. As of June 30, 2015, the balance to be amortized is ¢10,233 (¢20,466 as of December 2014).

(4) U-500 Insurance Policy

The U-500 all-risk policy is a replacement value agreement adjusted to the ICE's requirements that cover all risks of physical damage to property, such as: fire, landslides, floods, hurricanes, lightning, etc. This policy includes other types of coverage like equipment breakdown, business interruption, additional expenses, inland transit, robbery, wire theft, debris removal, errors and omissions, construction work in progress, sabotage, terrorism and catastrophic risks, among others.

**Note 13. Service Agreements**

The main service agreements entered into with third parties are detailed as follows:

\* Internal consumption for services incurred by the different areas of ICE.

(1) Reventazón Hydroelectric Project

Reventazón Hydroelectric Project is located in the intermediate watershed of Río Reventazón, about 8 km southwest of the city of Siquirres, 38 km downstream of the restitution site of the Powerhouse of Angostura Hydroelectric Plant.

The Project will use the water from Río Reventazón and will become, when built, one of the hydroelectric plants with the highest installed capacity in the country, with a design flow of 240 m<sup>3</sup>/s and a power output of 305.5 MW.

The plant is expected to start operations in late 2016. The estimated cost of the works amounts to US\$1,379 million.

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

On May 22, 2013, ICE and Banco Scotiabank subscribed an infrastructure trust agreement for the development of the Reventazón Hydroelectric Power Project called “UNO P.H. Reventazón/ICE/Scotiabank/2013 Trust Agreement”, whereby ICE acts as the Trustor and Main Beneficiary, Banco Scotiabank as Trustee, and the individuals identified in each notification for appointment of secondary beneficiaries as such.

The main clauses of the UNO P.H. Reventazón/ICE/Scotiabank/2013 Trust Agreement are summarized below:

- The purposes of the Trust are as follows:
  - a. Develop, continue the construction, lease, operate, and offer maintenance to the Reventazón Hydroelectric Power Project and subscribe the necessary financing to achieve those goals.
  - b. Create autonomous and independent equity to secure and guarantee compliance with the Trust’s obligations.
  - c. Organize the Guarantee Trust to which the Trust Equity will be transferred, whereby this Trust will act as the trustor, the secured creditors as the beneficiaries, and this Trust’s trustee as the trustee. The trustee of the Guarantee Trust is Banco Scotiabank.
  - d. Comply with the Trust’s obligations established in the transaction documents, including making payments to secured creditors that granted loans or invested in securities for the development, financing, construction, lease, operation, and maintenance of the Reventazón Hydroelectric Power Project.
  - e. Once (i) the objectives of this Trust have been met, (ii) the obligations established in the transaction documents have been fulfilled, and (iii) the trustee receives written authorization from the representative of the secured creditors; transfer the Trust Equity to the Trustor, who also acts as the Main Beneficiary.
  - f. Pursue any other objective or purpose derived from the nature of this Trust Agreement and the transaction documents that does not infringe good faith in business or violates the relevant legislation.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- Trust Equity will be comprised of: (i) assets placed in the trust property to develop the Reventazón Hydroelectric Power Project; (ii) works and equipment involved in the project's development process; (iii) the Trustor's contributions in cash or kind; (iv) resources obtained by the Trust under loan agreements and from issue, placement, and management of securities, if issued; (v) income from the lease of the plant and any other income generated by the Trust in the normal course of business; (vi) licenses, authorizations, studies, and documents required to support the attainment of the Trust's objectives; (vii) trust accounts and investments and returns derived therefrom and any other resources that the Trustee manages in accordance with this Trust; (viii) any income earned by the Trust generated from the project, directly or indirectly; (ix) future goods that would be included in the Trust Equity; (x) the equity of the Guarantee Trust upon its return to the Trust as trustor in accordance with the terms and conditions of the Guarantee Trust.
- The Trustee shall manage and, if appropriate, make use of the Trust Equity in accordance with purposes and provisions of the agreement and meeting all of the Trust's obligations.
- All funds received by the Trust on any account or reason shall be immediately deposited by the Trustee in the bank accounts held with the Guarantee Trust, in accordance with the terms and conditions of the Guarantee Trust; except for the funds obtained from bridge loans, which shall be deposited in the accounts opened by the Trust for such purposes.

On May 22, 2013, ICE and Banco Scotiabank subscribed the following agreements related to the financing structure established under the Trust:

#### *EPC (Engineering, Procurement, and Construction) Turnkey Agreement:*

- The UNO P.H. Reventazón Trust acts as the employer and ICE as the contractor responsible for the construction of the Reventazón Hydroelectric Power Project. The agreement amounts to US\$693 million and the construction must be completed no later than the fourth quarter of 2016.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- As set forth in this agreement, ICE shall quarterly provide UNO P.H. Reventazón Trust, with the details of the amounts they consider they are entitled to charge, together with the supporting documentation. Once the details of costs are reviewed and approved, the Trust will reimburse ICE.

The main services ICE will provide under this agreement are: Engineering in the project design, management of required materials purchasing, acquisition of necessary labor and construction services of the project.

#### *Lease agreement for the Reventazón Hydroelectric Power Project:*

- The UNO P.H. Reventazón Trust acts as the lessor and ICE as the lessee. The agreement is for a minimum term of 17 years and semiannual payments are based on the amount paid by the UNO P.H. Reventazón Trust for the debt with the creditor banks.

As of June 30, 2015, the service agreement for Reventazón Hydroelectric Project shows an increase related to the balance as of December 31, 2014 for ¢ 14,590, mainly for the costs associated with the implementation of the project. The balance of service agreements amounting to ¢37,927 corresponds to costs incurred and to be billed according to the agreement.

As of June 30, 2015, ICE has transferred as trust property to UNO P.H Reventazón Trust, lands with a value of ¢1,102.

\* Internal consumption for services incurred by the different areas of ICE.

Below is a description of the nature and main transactions of works for the design and planning of the implementation during the period:

(1) El Diquís Hydroelectric Project (PHED)

PHED is located in the Southern Region of Costa Rica, will have a power output of 650 MW and an annual power generation of 3,050 GW/h, and was declared a matter of national interest in Executive Order No. 34312-MP-MINAE of 2008.

As of June 30, 2015, PHED includes costs incurred prior to construction and disbursements made during the investment phase, which encompasses the design of the works, and technical, economic, and financial studies for a total of ¢80.262 (¢78.825 in 2014), necessary for completing the Feasibility Studies and the final Environmental Impact Study. PHED is in the process of completing, followed by a presentation to the National Technical Environmental Secretariat (SETENA), the Environmental Impact Study. The viability or Environmental License is necessary to begin construction, which is issued with SETENA's approval of the study. To start its construction, there should be an environmental license or viability issued and approved by SETENA.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Within the area required for PHED, there are some indigenous communities, including: China Kichá (Cabécar) and Térraba (Térraba), which use 74 and 653 hectares of their territory. However, these areas would be flooded for the construction of the project's reservoir. For this reason, legal and consultation processes have started with these indigenous communities, seeking to reach an agreement for the implementation of the Project.

In the opinion of ICE's Institutional Legal Division, consultations with the indigenous territories represent a binding event for granting the Environmental License required by ICE to begin the constructive stage of PHED.

Status of lawsuits involving Diquís Hydroelectric Project:

- Administrative Contentious

The legal proceeding under number 11-001691-1027-CA, was partially archived due to the dismissal request filed by Asociación Desarrollo Indígena de Térraba; consequently, the claims filed by third-party stakeholders who, according to the Court, became plaintiffs with their own claims.

- Constitutional Chamber

In December 2014, *amparo* proceedings were filed under File No. 14-019128-0007-CO, against order No. 34312-MP-MINAE of 2008 that declares PHED activities in favor of ADIT of public interest and national convenience, due to the breach and non-compliance with resolution 2011-01275 resulting from Unconstitutional Action No. 08-009215-0007-CO, which granted a 6-month term to conduct the consultation with indigenous peoples, a resolution is pending as of to date.

- Indigenous Consultation

ICE is waiting for a reply by the President's Office of the Republic to the Ombudsman Office regarding the recommendations included in the report "The right of indigenous peoples to a consultation within the framework of El Diquís Hydroelectric Project," as of June 3, 2015, sent through Official Communication Number No.05271-2015-DHR-(PE) and aiming to: a) designate, as a priority, a governmental agency to be in charge of organizing the consultation processes to be conducted in the Costa Rican Indigenous Territories; b) define, through a consensus with the indigenous peoples, the proper conditions and procedures to be dealt with when they are consulted regarding the legislative or administrative projects or actions affecting their rights; and c) once a governmental agency is designated and a consultation guide is defined for each Indigenous Territory, such governmental agency (ministry or an office in charge) will conduct a consultation process

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

regarding El Diquís Hydroelectric Project in the indigenous territories that might be affected.

(2) Borinquén Geothermal Project:

The project is located in the Guanacaste Mountain Range, on the Pacific slope of the Rincón de la Vieja Volcano, and will have an estimated power output of 55 MW.

Costs incurred June 30, 2015 correspond to work related to site preparation for deep-well drilling amounting to ₡22,008 (₡21,852 as of December 31, 2014). Construction is expected to begin in late 2015.

Borinquén Geothermal Project has the finished and approved feasibility study as of December 31, 2014, as the initial proposal was modified, with the decision of making a Preparatory Technical Study to demonstrate an eventual geothermal potential in the Borinquén sector. This report, for the purposes of the Japan International Cooperation Agency (JICA) (financing part of the Project) and for the Costa Rican government represents the Feasibility Study.

Amortization Method

For calculating the amortization of licenses, software, and applications, ICE applies the straight-line method from the date the assets were first used, over a useful life of three years. ICE's rights of way and easements have no defined term over which they generate future benefits to ICE; accordingly, they are not amortized.

(1) Easements and Rights of Way

Easements and rights of way correspond to the payments made to the owners of lands which ICE Group has to access to develop different projects and provide electricity and telecom services. According to the terms of the agreements, ICE Group is only entitled to easements or rights of way, but this does not mean the purchase of lands or transfer of ownership to ICE Group.

Rights of way agreements do not stipulate a term in year to exercise the right, thus establishing a permanent easement. The aforementioned rights of way start mainly in the transmission lines. Therefore, these intangible assets meet the requirements of an indefinite life because there is not defined term so that these assets can continue generating cash flows for the Entity; therefore, they are not amortized.

Notes to the Interim Consolidated Financial Statements  
*(In millions of colones)*

(2) Goodwill

This is excess acquisition cost over the carrying amount (net equity) of the subsidiaries acquired in 2013: Cable Visión de Costa Rica, S.A and Eólico Valle Central, S.A (merged in 2014 with CNFL), the amortization term for this goodwill is 20 years (see note 3 (b) (i)).

INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

**Note 17. Guarantee and Savings Fund (Restricted Fund)**

The Guarantee and Savings Fund for ICE Employees was created through Law 3625 of December 16, 1965. According to this law, ICE must allocate reserves and funds for the payment of occupational rights and for the personal fund, and it must continue with the contributions corresponding to an amount no less than the contributions made by the employees.

The main activity of the Guarantee and Savings fund is to grant mortgage and personal loans to the employees for housing solutions, as well as generating yields that are, in part, capitalized to savings of the contributors and, in part, paid in the annual yield distribution.

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

#### Enforcement Clauses (Covenants):

Normally, credit agreements establish a series of commitments on environmental, legal, financial, operational and business matters, among others, that the debtor should take care of, and that are usually known as “Covenants.” In the particular case of ICE, some of the executed contracts to date include “Positive covenants” and “Negative covenants,” which establish, respectively, commitments ICE unavoidably shall comply with and restrictions or limitations to certain acts, that generally require previous approval from the creditor entity.

Some of the loan agreements also establish clauses called:

- a) *Cross Default:* these indicate that upon execution of the agreement, ICE expressly and irrevocably accepts that noncompliance of the obligations, payment and/or any other credit terms and conditions, and/or the credits ICE maintains in force with other creditors, constitute causes of acceleration of the credit for which the “Cross Default” clause was established, and for all the credits in force from the same creditor.
- b) *Pari Passu obligations:* whereby ICE agrees that its obligations under the corresponding agreement and its guarantees constitute, in every moment, obligations with a priority on payment right, at least equivalent (*pari passu*) to any other obligations, current or future, arising from any ICE’s debt (different from any preferred debt as mandated by law).

In addition, ICE Group has the obligation to comply, among others, with the following general clauses, which are detailed in some of the loan agreements:

- a) It will not merge or consolidate with any person, or will allow that any of its subsidiaries does, except that: (a) any subsidiary of the Borrower (ICE) might merge or consolidate with any other subsidiary of the Borrower, and (b) any subsidiary of the Borrower merges with the Borrower, and (c) any merge or consolidation approved by the Creditor (Bank), provided that, in each case, noncompliance had not occurred and continued at the moment of such proposed transaction, or that noncompliance arises from it.
- b) It will not sell, lease, transfer or dispose otherwise, nor will it allow that any subsidiaries sell, lease, transfer or dispose otherwise of assets, nor will it grant any option or any other right to buy, lease or otherwise acquire assets, except by (1) inventory sales in the ordinary course of business, (2) a transaction authorized by the Bank, and (3) sales of assets for its fair value for a total amount of not more than US\$20 million (or its equivalent in other currencies) in any year.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- c) It will not enter into any agreement by virtue of which it agrees or is required to share with third parties the income, directly or indirectly derived, from the works built with financing obtained from the entities shown on the previous table.
- d) It will not create or accept the existence, nor will it allow that any subsidiaries create or accept any encumbrance regarding any of its property, owned by ICE now or subsequently acquired, nor will it transfer or let any subsidiaries transfer any right to receiving income from the works that will be financed by obligations incurred with the Bank.
- e) It will have and make each of its subsidiaries acquires insurance with responsible or reputable insurance associations or companies, in the amounts and with the risk coverage usually taken by the companies in similar businesses, and that have similar properties in the same general areas in which the Borrower or such subsidiary operates.
- f) It will comply and make that each of its subsidiaries comply with, substantially, the Laws, Rules, Regulations and applicable orders, and such compliance shall include, among others, compliance with Environmental Laws, except when it is not reasonably expected that noncompliance has a Substantial Negative Effect.

As of June 30, 2015, financial covenants regarding debt agreement comply with the established limits.

**Note 22. Income Received in Advance**

Income received in advance in the short and long term is as follows:

|  |          | As of June 30,<br>2015 |               | As of December 31,<br>2014 |               |
|--|----------|------------------------|---------------|----------------------------|---------------|
|  |          | Long-term              | Short-term    | Long-term                  | Short-term    |
| Prepaid mobile services (1)                      | ¢        | -                      | 10,130        | -                          | 7,760         |
| Government grants (2)                            |          | 4,375                  | 307           | 4,517                      | 304           |
| Transfer in Property Spare Parts - Materials (3) |          | -                      | 9,461         | -                          | 8,456         |
| Other  |          | -                      | 2,148         | -                          | 2,076         |
| <b>Total ICE Group</b>                           | <b>¢</b> | <b>4,375</b>           | <b>22,046</b> | <b>4,517</b>               | <b>18,596</b> |

The following is a description of the nature of the main income received in advance as recorded by ICE Group:

(1) Prepaid Mobile:

It corresponds to the income received in advance related to the sale of mobile services, prepaid modality, which has not been consumed by clients as of the closing date. The income received for prepaid mobile services is recognized in the consolidated balance sheet, when ICE Group receives the money from its clients and wholesalers, and recognizes income and expenses in the consolidated statement of financial position, as end users receive the services.

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### (2) Government subsidies:

Within the framework of the “Cool Earth Partnership” Japanese initiative, the Japanese government granted ICE a donation of approximately US\$10.5 to build the “Photovoltaic System” located in Sabana Norte, with a capacity of 3KW expected to generate 3.5 Kh; and from the “Solar Park of Miravalles”, located in la Fortuna de Bagaces, with an installed capacity of 1MW, expected to generate 1.2GWh. ICE Group recognizes the subsidies of the governments, local or international, in the consolidated balance sheet once they are granted to them, and are systematically transferred to the consolidated statement of income and expenses, according to the useful life of the asset related to the received subsidy.

### (3) Transfer of Ownership of Spare Parts – Materials:

They correspond to the transfer of ownership on behalf of ICE Group of the costs of spare parts, assets and necessary tools for maintaining Toro III and Garabito Plants, over which ICE Group did not make any expenditure. This income is realized on the consolidated statement of income and expenses, once the contractually established maintenance services are provided, and inventories transferred to ICE Group are used.

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

(1) Performance bonds - received

Performance bonds correspond to bonds issued to guarantee that the goods and services offered by a supplier will be delivered or rendered to ICE in accordance with the agreed terms and that, in the event of noncompliance, ICE will be compensated.

(2) Collection agents

“Collection agents” corresponds to guarantees that ICE received from external collection agents to ensure the recovery of public funds held in the custody of those agents for a specified period..

(3) Bid bonds - received

Bid bonds correspond to bonds that guarantee the good faith participation of bidders of goods and services in ICE’s tender processes and, if awarded the contract, that the bidders will comply with the procedures established in the corresponding award.

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### **Note 26. Service Income**

#### **Regulation of Electricity Services**

Law No. 7593 “Law on the Costa Rican Public Service Regulatory Authority (ARESEP)” of August 9, 1996 establishes that “the Regulatory Authority will set prices and rates, and enforce compliance with standards of quality, quantity, reliability, continuity, timeliness, and optimum rendering of public services”, specifically with respect to the generation, transmission, distribution, and sale of electric power.

On March 19, 2012, through Resolution RJD-017-2012, published in La Gaceta No. 74 of April 17, 2012, the Regulatory Committee of ARESEP published the factors related to the cost of fuels in accordance with the Variable Fuel Cost (CVC) Methodology and the rate schedules to be applied in the four quarters of 2013, in effect as of January 1, 2013.

This methodology allows a faster recovery of the differential between actual and estimated fuel expenses from thermal generation since it considers the quarterly review to make the adjustments necessary in the rate schedules applicable in the following quarter.

#### **Telecom Service Regulation**

Article 50, “Prices and rates”, of Law No. 8642 “General Telecommunications Law” dated May 14, 2008 states that “rates for public telecom services shall initially be set by SUTEL using the price ceiling methodology or any other system that promotes competition and the efficient use of resources, in accordance with the guidelines, procedures, and frequency defined in regulations.”

Through Decision No. RSC-295-2012, SUTEL authorizes operators to modify the modality under which prepaid mobile Internet data transfer services are charged. Also, as published in the Official Bulletin La Gaceta dated April 25, 2013, SUTEL excluded information services (multimedia messaging, text messaging, and video calling) from the current rate schedule, granting operators legal authority to review and adjust the rates applicable to such services.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Below is a description of the main operating lease agreements entered into by ICE Group.

(1) Securitization Trusts:

ICE, BCR, and Banco Nacional de Costa Rica subscribed Securitization Trust agreements whereby ICE acts as the trustor and beneficiary and the corresponding Banks are named as the trustees. The purpose of the agreements is the independent generation and management of the necessary financial resources to build the Peñas Blancas, Cariblanco, and Toro 3 Hydroelectric Power Plants, and the Garabito Thermal Power Project.

The trusts may obtain those resources by acquiring commercial loans and by issuing, placing, and managing securities through securitization. Currently, the trusts are authorized to issue public debt, and as of June 30, 2015 and 2014 the financial statements of these trusts register liabilities for this concept.

The trusts contract ICE to build the aforementioned plants given its experience in the development of this type of projects. In their capacity as the owners, the trusts lease the plants to ICE for terms ranging between 11 and 13 years. At the end of the lease terms, ICE may exercise the purchase option established in each lease agreement.

The main clauses of the trust agreements are summarized below:

- The purpose of the agreements is to create trusts to generate and manage the necessary resources for development of the projects, serve as vehicles to create autonomous equity that will be used in a securitization process, and obtain the necessary resources to finance the project.
- Trust assets will be comprised of the following:
  - a) The liquid assets generated by the trusts from the issue and placement of debt securities.
  - b) Tangible and intangible assets of the trustor, which are essential to the object of the contract, will be transferred as trust property to the Trust; the civil works, equipment, facilities, workshops, vehicles, equipment and materials inventory, office equipment, computer equipment, including software, licenses, and any others that have been acquired with the trust's resources for the development of the projects and for the operation and maintenance of the plants, as well as the right to use the land owned by the trustor, as required for the development of the projects, and all the intellectual information and studies produced for and during the development of the project's works in charge of the trusts.
  - c) The agreed-upon income from the lease of power plants.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- d) Any other income obtained by the trusts in the normal course of business.
- The trustee may only use the trust assets according to the provisions expressly contained in the trust agreements and pursuant to the instructions issued by the trustor. Both, the trustee's powers of disposal over the trust assets as well as the trustor's powers to issue instructions on such assets, are limited to the execution of those acts that are strictly necessary to fulfill the purpose of the trust.
  - The trust's financial policy will be to allocate the resources obtained from the securitization process and temporary investments to construction of the projects, debt servicing, and covering the trust's operating costs. Upon compliance with such obligations, all of the trust assets will become the property of the trustor ipso jure.
  - The trustor must appoint a Manager from the Execution Unit, who should be accepted by the trustee, and who shall act as the superior, with the inherent rights and duties.
  - The trustor and the trustee agree that ICE will be hired by the Trust to assume the responsibility of the construction of the projects, through an engineering and construction agreement.
  - Upon expiration of the trust agreements, all of the trust assets, without exception, delay, or condition, will be automatically transferred ipso jure to the trustor, who will become the legitimate owner.
  - The Peñas Blancas trust is for a term of 20 years and the Cariblanco, Garabito, and Toro 3 trusts are for terms of 30 years.

(2) Las Pailas Geothermal Power Plant:

In December 2006, ICE's Board of Directors agreed to approve Las Pailas Geothermal Project through an execution-financing scheme referred to as "nontraditional," in which ICE will be the constructor and the Central American Bank for Economic Integration (CABEI) will be the investor, developer, and owner.

Afterwards, ICE will technically and commercially operate the infrastructure, acting as lessee, during a term of 12 years, at the end of which it may execute the purchase option for property of the plant.

In March 2007, ICE and CABEI signed a contract for the lease with purchase option for Las Pailas Geothermal Plan, which includes the following main provision:

- A lease is set for a term of 12 years with a purchase option for Las Pailas Geothermal Plant, starting upon the satisfactory receipt of the works by ICE.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- The total amount of the lease is US\$240 (in millions), including lease installments and maintenance fees.
- At the end of the lease term, the purchase option may be executed in the amount of 15% of the total investment accrued during the construction stage.
- CABEI will invest in the construction of the plant in an amount of up to US\$130 (in millions).
- CABEI agrees that ICE will carry out construction of the entire plant and its interconnection to the National Interconnected System. The total cumulative investment at the end of the construction phase will have been made in U.S. dollars, consisted of the following:
  - a) Actual cumulative direct investments made by CABEI for construction of the plant..
  - b) 0.75% (one time only) of CABEI's direct investment at the time CABEI makes the first disbursement of the direct investment.
  - c) 0.75% of the estimated direct investment that has not yet been used for construction of the plant.
  - d) Return calculated at the 6-month LIBOR rate + 2.25% on the partial cumulative investment made during construction of the plant.
  - e) Administrative expenses derived from creation and operation of the Project Management Unit to be set up by CABEI in accordance with the agreement.
- ICE agrees to lease the plant and act as the "lessee". CABEI will be the "lessor".
- The term of the lease will start 48 months after the beginning of construction of the plant.
- Should ICE elect not to exercise the purchase option, the parties may agree to extend the lease agreement for up to 6 years, which will require an extension to the agreement. ICE may exercise the purchase option prior to expiration of the agreement for an amount equivalent to CABEI's investment not yet recovered.

(3) Tejar Step-down Substation - JASEC:

In April 2010, ICE and JASEC subscribed a lease agreement with an option to purchase the Tejar Step-down Substation as well as easements and sites for towers for the expansion of the Rio Macho-Este transmission line to 230 kW. ICE acts as the lessee and JASEC as the lessor. The works are located in the district of San Isidro, El Guarco Canton, Cartago.

The term of the lease is 10 years from the date on which JASEC delivers the substation and related works to ICE in the conditions required to start commercial operations. This happened starting on June 4, 2012.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

(4) Toro 3 Hydroelectric Power Project:

ICE and JASEC subscribed a partnership agreement for the joint development of the Toro 3 Hydroelectric Power Project, whereby BCR acts as the trustee and ICE and JASEC as trustors.

The partnership agreement involved the subscription of a 137-month lease agreement with a purchase option, whereby ICE and JASEC act as lessees and the Toro 3 Hydroelectric Power Project Securitization Trust as the lessor (see note 6).

The business Alliance between ICE and JASEC involves equal participation in respect of rights and obligations and benefits derived from the construction and commercial exploitation of the Toro 3 Hydroelectric Power Project over its useful life. Both entities will participate in the development of the Project, with an ownership interest of fifty percent (50%).

(5) Cooperativa de Electrificación Rural Guanacaste, R.L.:

On February 16, 2010, ICE and Cooperativa de Electrificación Rural de Guanacaste, R.L. (Coopeguanacaste) entered into a lease agreement with an option to purchase the infrastructure of the power transmission Liberia-Papagayo-Nuevo Colón. ICE acts as lessee and Coopeguanacaste as lessor. The term of the agreement is 137 months and monthly lease payments are as follows:

- Monthly payments in colones that the lessor must make to its creditors (BCR and Banco Popular y de Desarrollo Comunal as a result of the loans granted to Coopeguanacaste), and
- Amounts payable by the lessor for monthly infrastructure maintenance costs.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

#### (1) Cogenerators:

Under the terms of Law 7200 “Law for the Authorization of Autonomous or Parallel Energy Generation,” which declares a matter of public interest the purchase of energy by ICE to those private companies that comply with the conditions contained in this Law, ICE has entered into agreements with various cogenerators for purchasing energy. This Law provides for two systems or chapters: Chapter I, “Autonomous or Parallel Generation,” which generates the so called BOO (build, Own, and Operate) agreements, and Chapter II, “Purchase of Power under the Competition System”, which generates the so called BOT (Build, Operate, and Transfer) agreements).

As of June 30, 2015, ICE has subscribed power purchase agreements under Chapter II that correspond to BOT agreements (Built, Operate, and Transfer) with the following independent power producers: Geoenergía de Guanacaste, S.R.L.; Unión Fenosa Generadora La Joya S.A.; Hidroenergía del General (HDG), S.R.L.; Planta Eólica Guanacaste, S.A.; Consorcio Eólico Chiripa S.A. and Unión Fenosa Generadora Torito S.A., As a result, the following projects are in the construction phase PH Chucás and Capulín and Orosi Wind Project in its final stage. During the life of the agreements, those independent power producers must build, operate, and provide maintenance to the corresponding plants. The power generated will be sold exclusively to ICE. At the end of the term of those agreements, the ownership, management, and operation of the plants will be automatically transferred to ICE, free of any liens and encumbrances. The corresponding cogenerators or ICE may request the early transfer of the power generation plants.

In September 2015, the Orosí Wind Power Generation Plant will become operational and will generate 50 MW, and it is owned by Inversiones Eólicas de Orosí Dos, S.A., based on a BOT agreement.

Some of the most relevant terms and conditions contained in the aforementioned agreements are the following:

- The cogenerators shall be responsible for the financing, design, procurement of supplies, construction, evidence, startup and maintenance of the plants. The co-generators also agree to deliver all the energy produced to ICE during the term of the contract.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements

*(In millions of colones)*

- The cogenerators shall produce energy with the quality and standards of operation set forth in each contract and will fully deliver it to ICE, with the exception of that required to feed the auxiliary equipment and for servicing of the plants, pursuant to the contracts.
- The cogenerators assume the risk for damage, loss or destruction of the equipment and facilities, during the term of the contract, due to any reason or cause whatsoever that is directly attributable to the cogenerator, its contractors, subcontractors or suppliers, excluding force majeure.
- The purchase price for electricity generated is established in each agreement based on the bid price and the price awarded in the corresponding tender processes. The agreements include price adjustment forms for variations due to inflation, and which apply on the operating and maintenance cost component.

From the plant's commercial operation beginning date, the cogenerators must, at their own expense, obtain and maintain, at least, the following insurance policies, according to their availability in the market: worker's compensation and full liability for physical injuries.

ICE may suspend the reception of energy generated by the cogenerators and shall be exempt from payment for said energy during such period of suspension for the following reasons:

- Alteration of meters.
- Non-compliance in relation to the condition in the point of delivery agreed, under the responsibility of the cogenerator.
- Inability of the cogenerator to supply the energy in accordance with the parameters of operation required.
- For failure to renew the performance bond.
- For failure to renew the insurance policies.

The current agreements are in effect for terms that range between 15 and 20 years and expire between March 2016 and October 2033.

For cogenerators who have subscribed agreements under Chapter I of Law No. 7200, the following three types of agreements are in effect:

- Class A: Applicable to hydroelectric power plants with a power output of less than 5 MW.
- Class B: Applicable to hydroelectric power plants with a power output greater than 5 MW.
- Class C: applicable to wind power generation plants.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

The general terms of these agreements establish that, during the life of the agreement, ICE will purchase any surplus electric power that the cogenerator may supply once its own energy needs are met, up to the maximum power output agreed. The cogenerator commits to operate the plant so that the power output delivered to ICE at the point of measurement does not exceed the power output agreed.

ICE will not make any payments for the power delivered by the cogenerator exceeding of the maximum power output agreed. Electricity received in light of these agreements is paid at the rates in effect set by ARESEP upon delivery.

Under Chapter I of Law N° 7200, ICE signed agreements as of the date the law was enacted, in 1990. As of 2009, once the agreements executed in the nineties started to expire (which maximum term was 15 years), ICE proceeded to renewal, for the remaining term of the concessions (which were granted for 20 years.) Currently, agreements are being renewed once the companies obtain new concessions, both for use of water forces, in case of hydroelectric projects, and the generation public service granted by ARESEP. Currently, there are 24 agreements in force: 3 wind plants, 2 sugar plantations, and 19 hydroelectric plants.

In addition, as of 2012, once ARESEP published the rates for new plants, and the new regulation for Chapter I of Law No. N° 7200 was published, ICE started the selection process of projects with which new agreements will be signed. In June 2012, Bid No. 01-2012 was published, through which five wind projects and six hydroelectric projects were selected, out of which only the Tila Wind Project has been signed, which is under construction and is expected to be operating next year. The Campos Azules wind project is in the negotiation stage, which became operational in the first quarter of 2015.

In February of this year, Bid No. 02-214 was published, which results appeared in La Gaceta of June 25, and it was final on August 29, once the General Management rejected the motion of appeal filed by one of the participants. In this second bid, 2 wind projects and 4 hydroelectric projects were selected, one of which refused the selection. In December 2015, Vientos del Este Wind Power Generation Plant will become operational with a generation of 9 MW.

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

Rate Adjustment for Private Generation Plants

On April 8, 2015, Resolution RIE 037-2015 of March 27, 2015 was published in the Official Bulletin La Gaceta, in which ARESEP authorizes a rate adjustment for private generation plants selling energy to ICE, which generation sources are hydroelectric and wind power, under Law 7200. This adjustment represents an increase of 3.4% as compared to the previous rate.

Transfer of Geoenergía de Guanacaste Ltda. Plant to ICE

On March 25, 2015, the assets Geoenergía de Guanacaste Ltda. Plant (geothermal plant), which operated under the modality of agreement of B.O.T. (build, operate, transfer), for a period of 15 years from its startup is transferred to the Costa Rican Electricity Institute.

**Note 30. Administrative Expenses**

Administrative expenses are detailed below:

|   | For the period ended<br>on June 30, |               |

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

(1) Los Llanos Study

Los Llanos Hydroelectric Project is located in the Basin of Naranjo River. This project does not have an oscillating tank; the powerhouse is located on the right bank of Tocori creek and the turbinated waters flow into the river through a 4-km channel, and there is a possibility of adding the waters of Brujo River and increasing the generation power to 126 MW provided that its environmental limitation problems are solved.

(2) Ayil Hydroelectric Project

Ayil Hydroelectric Project, which will be located in the Cabécar indigenous territory in Bajo Chirrió, Matina, Limón, whereby a term of 3 years, related to pioneer roads that require the construction of several bridges.

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### **Note 36. Tax Regulations**

#### (a) Tax Obligations

ICE Group has tax obligations governed by the provisions contained in: Income Tax Law N° 7092 and its amendments, Regulations to the Income Tax Law and its amendments, General Sales Tax Law N°6826 and its amendments, Regulations to the General Sales Tax Law and its amendments, General Customs Law and its regulations and amendments, Law No. 8660 for Strengthening and Modernizing Public Entities in the Telecommunications Sector, and General Telecommunications Law N° 8642.

#### (b) Income Tax

The *Instituto Costarricense de Electricidad* is a taxpayer subject to the income tax, as it performs profitable activities and generates profits. On the other hand, Law Decree Number 449, regarding the creation of *Instituto Costarricense de Electricidad*, is established in article 17 as follows: *“ICE’s financial practices shall aim at capitalizing net profits obtained through the sale of electrical energy and any other source it may have access to, in the financing and implementation of national energy plans and the promotion of the industry based on electrical energy.”*

In addition, Law No. 7722 entitled “Government Institutions Subject to Payment of Income Tax” stipulates that *“excess of income over expenses constitute taxable income and shall be calculated as gross income less costs, productive expenditures, and investment reserves or development funds that are necessary and relevant to production of that income.”*

Given that ICE must reinvest the total net profit it obtains, no surplus is produced, which means that it does not show any taxable income, and, therefore, it has no income tax liability. However, the Costa Rican Tax Authorities normally imposes income tax withholdings that are subsequently applied as a credit to the sales tax liability.

According to the Law on Strengthening and Modernization of Public Telecommunication Companies (Law No. 8660), ICE and its subsidiaries will be subject to payment of income and sales tax, excluding income tax on the delivery of traditional basic telephone services, when they begin to act as operators or providers of telecom and electricity services and products in competitive local markets. The other exemptions granted through Executive Order No. 449 of April 8, 1949 and any other exemptions granted by the legal system will remain in effect (see note 40).

ICE Group's subsidiaries are subject to payment of income tax pursuant to Law No. 7722, which specifically lists State-owned institutions subject to such tax. In accordance with Executive Decree published in Official Bulletin La Gaceta No. 185 dated September 23, 1999 and Law on "State-owned Institutions subject to Income Tax Payment" (Law No. 7722), income or

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

benefits generated by companies from services provided and their economic and financial activities are to be included, whether exempt or not, under the provisions of prior laws. Only the costs, expenses, investment reserves, and development funds that are necessary and relevant to production of that income are deductible.

For these companies, income tax includes current tax. Income tax is recognized in the consolidated statement of profit or loss, except to the extent that it relates to items recognized directly in equity, in which case it is recognized in equity. Current tax is the expected tax payable on the taxable income for the year, using the tax rate in effect at the cut-off date. As of December 31, 2013 and 2012, deferred tax in respect of temporary differences is adjusted in ICE Group's consolidated financial statements due to the alignment of the subsidiaries' accounting policies with those of ICE Group.

(c) General Sales Tax

ICE is a taxpayer for the general sales tax, pursuant to the General Sales Tax Law N°6826. This is a value added tax on the sale of goods and rendering of services. The fees applied are the following: for the sale of energy for residential consumption, 5% over the excess of 250 kw of monthly consumption; 13% for commercial consumption and rendering of telecommunications services.

Because it is a value-added tax, ICE pays sales tax on the merchandise and services required to develop its economic activity. Pursuant to article 14 of the General Sales Tax Law, sales tax paid on merchandise and inputs that are used to produce energy and telecom services can be applied as a credit to the sales tax liability for the period.

(d) Special parafiscal contribution for telecommunications carriers and providers to the National Telecommunications Fund (FONATEL) (General Telecommunications Law Number 8642)

Article 39 of the General Telecommunications Law N° 8642 sets forth a quasi-fiscal tax to finance the National Telecommunications Fund (FONATEL) to ensure compliance with the principles of universal access, universal service, and cooperation. The quasi-fiscal tax will levy on the gross income directly earned by the operators of public telecommunications networks and telecommunications service providers available to the public who generated the taxable event by performing the aforementioned activities and receiving the specific benefit from State activities.

This tax is defined in an affidavit issued for periods of one calendar year. The affidavit must be filed by March 15 of each year and the tax is paid in four equal installments on the 15th day of March, June, September, and December of each year following the corresponding tax year-end.

The tax rate is set annually by SUTEL no later than November 30 of the corresponding tax year. The percentages established for this tax range between 1.5% and 3%, and the definition of the

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

final rate will be based on SUTEL's estimates of the income and costs of the projects to be executed in the following budget year. In the event that the tax rate is not defined by SUTEL in a timely manner, the applicable rate for the immediately preceding tax period will be used.

(e) Red Tax on Mobile and Conventional Telephony Services to Finance the Costa Rican Red Cross (Law No. 8690")

This tax was created by Law No. 8690. The Red Tax corresponds to a fixed monthly payment by the owners of a mobile or conventional telephone line to be collected by ICE or any other institution offering telecommunication services and transferred to the National Treasury. It will be 1% of the monthly billings of mobile and conventional telephone services starting at ¢5,000 colones for the mobile and conventional telephone service provided to natural and legal persons. It will not exceed ¢500 in colones per telephone line.

(f) Tax in favor of the Firefighter Department of Costa Rica

Law No. 8228, "Law of the Meritorious Firefighter Department of Costa Rica", dated March 19, 2002 was amended through Law No. 8992, "Law for the Economic Strengthening of the Meritorious Firefighter Department of Costa Rica", published in the Official Gazette on September 22, 2011. The latter Law amends articles 28 and 33 as well as article 40 of Law No. 8228 - "Financing of the Firefighter Department" and creates, as an additional source of revenue for the operations and sustained growth of the Costa Rican Firefighter Department, a tax equivalent to 1.75% (one point seventy-five per cent) of the monthly billings for electricity consumption of subscribers.

(g) Customs Duties

As set forth in the customs legislation, custom duties are comprised of custom duties and internal taxes, and they must be paid in full to legally import goods. The customs tax referred to as DAI is the Import Tariff Law, which is defined as follows: It is an ad-valorem tax determined according to a classification within the tax code established. The following are included among the internal taxes: Selective Excise Tax (rate according to goods), Tax Law No. 6946 (1%), General Sales Tax (13%), other specific taxes from IDA (Instituto de Desarrollo Agrario), IFAM (Instituto de Fomento y Asesoría Municipal), Depósito Libre de Golfito, among others. Thus, based on the type of merchandise or goods eligible for exemption, ICE has to pay the customs duties obligations for goods imported before customs clearance.

(h) Other Obligations

ICE Group also acts as a tax withholding agent for income tax, pursuant to the provisions contained in the Income Tax Law. Under this scheme, the taxpayer is the withholder, and ICE is jointly and severally liable. As withholding agent, ICE Group is responsible for withholding

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

the respective tax and for reporting the Tax Authorities on behalf of beneficiaries of income of the types specified below:

- Salaries, labor payments, compensation for personal services and directors' fees.
- Remittances or credits in favor of nonresidents for services such as transportation, communications, technical and financial advisory, personal services and other services, according to type and rates defined in articles No. 55 and 59 of the Income Tax Law.

#### **Note 37. Institutional Financial Risk Management**

ICE Group is exposed to the following risks from financial instruments: credit risk (noncompliance by customers or counterparties), liquidity risk (inability to meet obligations due to lack of liquidity), and market risk (currency, interest rate, and commodity risks). All these risks have an impact on the management of ICE Group; however, each risk is handled individually. For example, in the case of ICE, credit risk is regulated through the investment committee and in each segment; liquidity risk is managed by controlling treasury's cash flows; and liquidity risk is hedged with financial derivatives and the customers will be responsible for the collection risk. As a result, risk exposure is controlled through the committees described below:

ICE's Investment Committee is vested with the authority to monitor and control management of the temporary investments of ICE's Electricity and Telecom segments. This is the body to which the Corporate Financial Division delegates responsibility for defining investment policies and procedures. Therefore, this committee establishes the guidelines (restrictions) in respect of investment decisions, which include investment limits, currency, and risk levels for the portfolio composition.

The Investment Committee approves the Investment Strategy document (which is reviewed on a yearly basis) and the Management Limits document for ICE's investment portfolios (which is reviewed as determined by the Committee). It also has the Financial Investment Policy Manual and the procedure for making international investments, which seeks greater and better diversification of temporary investments.

According to the Organizational Autonomous Regulations, the coordination of the Institutional Risk Committee will be under the responsibility of the CEO since the General Management will disappear.

The Financial Risk Management and Institutional Financial Coverage Policy was approved and will be in force starting April 12, 2011. Its main goal is to:

*“Standardize institutional risk management by minimizing as much as possible the exposure to systemic or market risks in the financial operations, through an efficient financial risk management, taking advantage of the market opportunities, the available*

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

*financial instruments and in accordance with the Financial Risk Coverage Strategy.” This policy is currently under review for approval and implementation by the Subsidiaries.*

Risk management policies and systems are revised annually to ensure that they reflect changes in market conditions and ICE Group’s activities, this activity is performed by the Corporate Finance Division.

It is ICE Group’s policy to mitigate exposure as much as possible while taking advantage of the market opportunities, obtaining coverage that is aligned with its strategic goals.

The use of financial derivatives is governed by ICE Group’s policies and complies with the IFRSs, which provide written principles about the foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, and the investment of excess liquidity.

Each year, Corporate Finance Division develops a financial risk map for ICE together with other ICE departments and management of the subsidiaries and follows-up on action plans and control, some indicators are indicators of the financial risk management.

In addition, the Corporate Finance Division has focused its efforts in determining action plans and goals to comply with the financial plan and financial strategy for 2013-2021. For such purpose, its submits quarterly management reports to the top Management.

#### (a) Credit Risk

Potential losses due to noncompliance with the contractual terms of a client or counterpart in the operations performed by ICE, related mainly to cash, equivalents, accounts receivable, and investments.

As a way to mitigate this risk, control and follow up to risk ratings of investments granted by the risk rating agencies is implemented. There are investment limits in the institutional portfolio by market (local and international), by sector (public, rest of the public sector, private sector, and by issue), by sector, by instrument, by issuer, and by issue. For this risk, no collateral has been received as guarantee.

In the case of the subsidiary CNFL, credit risk is understood as the possibility that the company fails to comply with the payment for capital and/or interests, due both to external and internal factors of CNFL, which negatively affect the cash flow, the operational results and the prospective profits; the negative effect of a liquidity shortage is visualized in the credit risk exposure.

In the case of RACSA, credit risk involves the failure to apply control policies and measures to manage the level of credit granted to its customers, which may jeopardize income and generate high financial losses as a result of bad debt, in order to mitigate such risk.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Accordingly, RACSA applies customer quality controls through credit protectors and filters the portfolio of customers in arrears, developing customer profiles.

#### (i) Accounts Receivable

Accounts receivable are controlled directly in the Energy and Telecommunication Sectors. The process followed in each Sector to recover accounts receivable can be summarized as follows:

- Issuance of invoice and collection process through messengers in the telecommunications sector, with reminders of outstanding payments.
- Immediate suspension of electric and telephone services, after expiration date shown on the invoice, where the average collection period in the Telecommunications Sector is 29 days and 31 days for the Electricity Sector. The terms are established per sector and are included in the Collection Management Policy).
- Online collection process, through contracts with external collectors and banks, or internal collection through ICE cashiers.
- In the event that the balance outstanding is not recovered, the administrative collection process begins 35 days after the services have been suspended. Administrative collection involves locating the customer and informing about the delinquency as well as notifying the credit protector thereof so that the situation is included in the customer's credit history. For such purposes, ICE uses companies dedicated to collection or coordinating payment arrangements with customers to mitigate arrears.
- As a last resort, any residual past due accounts are processed by ICE's Legal Division and collection is pursued by legal action.

Note 3 of the Significant Accounting Policies explains in detail the accounting policy to record the estimate and the procedure for its administrative and legal collection management.

#### (i) Investments

From the credit risk or counterpart standpoint, there is control and follow up to the investment ratings held by ICE, according to the investment strategy and the risk profile determined by the Investment Committee.

Financial risks to which all financial operations regarding financial instruments are exposed will be determined, such as: short, mid and long term financing, treasury management, credit lines, bank letters, purchase and sale of foreign currencies, investments, bond issuance, purchase of raw materials, among others.

## Notes to the Interim Consolidated Financial Statements

*(In millions of colones)*

Through an agreement by the Board of Directors during Meeting 6063 in October 2013, the guideline to manage the colón/dollar hedge through financial derivatives was approved regarding the existing liabilities up to a ceiling of US\$970 million, with first-order banking institutions with which notarized legal documentation has been filed.

The investment guidelines are approved by the Board and the Manual of Investment Policies by Corporate Management and Finance Divisions. The latter contains all the guidelines regarding issuers, instruments and sectors allowed, as well as the matters that must be observed for the stock market and custodians.

| <b>Closing balance</b>             | ¢ | <b>32,717</b>             | <b>30,667</b>                    |

(b) Liquidity Risk

Liquidity risks refers to the potential losses due to anticipated or forced sale of assets with unusual discounts and that do not allow fulfilling obligations, or due to a position not being timely disposed of, acquired or covered through the establishment of an equivalent contrary position, in a timely manner.

Regarding liquidity risk, actions have been generated for the Energy and Telecommunications Businesses to provide a higher level of security in the projection of payments of the liabilities contracted, as well as a more rigorous stance on income projection, resulting in the ability to control treasury cash flow. These measures in the projection of liabilities and expenses, as well as for the income of both sectors, allow follow up and control of cash flow or liquidity risk, and also a better management of treasury operations, regarding the purchase and sale of currencies and access to short and medium term credit lines, among others.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

The Corporate Finance Division performs short, mid and long term cash flow projections that are used to estimate purchase of foreign currency, short-term financing, as well as anticipate liquidity needs.

Treasury management involves preparing the projected cash flows with the Company's budget information. It also prepares on a weekly basis a schedule with the daily cash inflows and outflows, which allows visualizing the behavior of cash flows and determining the daily liquidity needs. As part of this process, in order to obtain the most accurate payment information, especially for those cases where based on their amount have a large impact in petty cash, and in compliance with the Treasury policies, the businesses, and different areas of the company should send the payment schedule corresponding to 12 months. In addition, an important input is the information obtained from the Institutional Payment System, which not only provides the exact amount to be paid but also the maximum payment date, as established in the agreements.

Similarly, inputs and coordination with businesses regarding the behavior of income and the areas responsible for managing financing that allow a better matching are important, in order to optimize Treasury Management and obtain a better and timely attention of the payment obligations.

Liquidity is guaranteed by optimizing the payment cycle, first using no-cost sources and short-term lines of credit (if necessary). Likewise, the Treasury policies establish the terms of payment for providers, which is for a maximum of 30 days, once a week, except for the engagements where payoff date is fixed or ineludible, as of the event that originates the payment and presentation of invoice. Also, the policies establish the bank transfer as payment method, and payment orders are processed through the institutional payment system.

Lines of credit are part of the instruments that Management uses to finance working capital needs, issue of performance or bid bonds, opening and refinancing of letters of credit, which use throughout the years has allowed it to become one of the most popular short term financing options.

Lines of credit are approved as follows: amounts greater than US\$20 million are approved by the Board of Directors and amounts equal to or of less than US\$20 million are approved by the Corporate Procurement Board. Shortfalls are determined based on the schedule of cash inflows and outflows along with the required terms so as to obtain quotes and borrow funds from the lowest cost bank. Line of credit transactions are documented with a promissory note. The purpose of using lines of credit is covering mismatches between the date of receipt of income and the date of payment of obligations and other liabilities, typical of cash flow management.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

#### (c) Market Risk

The market risk is the risk resulting from changes in market prices, for example, exchange rates, interest rates or stock prices affecting ICE's income or the value of the financial instruments it keeps. The goal of risk management is to manage and control exposure to this type of risk within reasonable parameters while optimizing profitability.

ICE acquires derivative financial instruments to administer part of the existing market risk, which are valued according to the value provided by the instrument's issuer. Hedge accounting is used for those instruments that qualify, in order to mitigate volatility in the market prices of the financial instruments that have an effect on profit or loss.

Derivative financial instruments are traded with first tier banks with which confidentiality agreements and other documentation to trade derivatives have been formalized. ICE has made the decision, according to the Risk Strategy, to trade derivatives, specifically for existing liabilities.

The following risks have been determined for financial operations: variations in the interest rate (domestic and foreign) and foreign currency exchange rate, which affect the cash flow results, the value of instruments, and others. For such purpose, 9 derivative financial instruments have been acquired: 3 to cover interest rate risk (interest rate swaps), 1 to cover Japanese yen exchange rate to the US dollar, called Cross Currency Swap, and 5 Non Delivery Currency Swap to cover part of the colon/dollar exposure.

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### Capital Management

The Law for the Creation of *Instituto Costarricense de Electricidad*, Number 449 of April 8, 1949, article 17 of Chapter IV Assets and Profits, establishes the following: ICE's financial policy shall be to capitalize net profits obtained through the sale of energy and any other source it may hold, in the financing and implementation of national electrification plans and the promotion of the industry based on electric energy.

The Government will not obtain any part of these profits, as ICE cannot be considered an income-producing source for the Tax Authorities, but it will rather use all means at its disposal to increase energy production as the basic industry for the Nation.

The policy is to keep a sound capital base, in order to be viewed with confidence by the general market and to guarantee the Group's future growth.

It aims at maximizing profitability with regards to capital and financial investments, through a proper balance between indebtedness level and invested capital, aiming at decreasing the risk involved.

During the second quarter of 2015, there has been no change in the way ICE Group's capital is managed. ICE Group is not subject to external capital requirements.

The adjusted debt-capital ratio of ICE Group at the end of the consolidated balance sheet period is the following:

| Index Debt - Capital   | Up to June 30,<br>2015 | Up to December<br>31,<br>2014 |
|--|------------------------|-------------------------------|
| <b>Group ICE</b>   |                        |                               |

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

Estimation of Potential Losses:

According to the methodology used in SUGEVAL, adjustments were made in the evaluation of the potential loss for ICE's investments. A risk rating and write-off percentage are assigned to each investment based on the maturity of the instrument, as follows:

| Term          | International rating |                   |             | Weighting |
|---------------|----------------------|-------------------|-------------|-----------|
|               | Moody's              | Standard & Poor's | Fitch       |           |
| Short term    | -                    | A1+               | F1+         | 0%        |
|               | P1                   | A1+               | F1          | 1%        |
|               | P2                   | A2                | F2          | 2.5%      |
|               | P3                   | A3                | F3          | 5%        |

| 3     | BB                   | F3 Y P-3      | Scr-AAA y AAA (cri)<br>scr-AA y AA(cri) | Scr-1 y F1(cri)<br>scr-2 y F2 (cri) |

In the case of Central Bank, 0% write-off is applied; for Government and Finance Ministry investments, 0.5% write-off is applied; for repurchases, the counterparty rating is used; for investments without risk rating, these are classified under others with 10% write-off; for investments in dollars, sovereign rating and write-off are applied according to chart. The final result corresponds to the "potential loss".

# INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

Items in U.S. dollars were updated using the sell exchange for the colón with respect to the U.S. dollar established by the Central Bank of Costa Rica for operations with the non-banking public sector, which as of June 30, 2015, was ¢536,39 (¢542,22 as of December 31, 2014).

The main exchange rates used are as follows:

| <b>Name of currency</b> | <b>Exchange rate to U.S. \$</b> |                                |
|-------------------------|---------------------------------|--------------------------------|
|                         | <b>At 30 junio<br/>2015</b>     | <b>At 31 december<br/>2014</b> |
| Corona Sueca            | 8.24                            | 7.81                           |
| Libra Esterlina         | 1.58                            | 1.56                           |
| Franco Suizo            | 0.93                            | 0.99                           |
| Euro                    | 1.12                            | 1.21                           |
| Colones                 | 536.39                          | 542.22                         |
| Yen Japonés             | 122.30                          | 119.78                         |

In the case of currency operations, ICE Group adheres to the provisions of Law No. 7558, “Internal Regulations of the Central Bank of Costa Rica”, of November 27, 1995. Article 89 of that law states that “Non-banking public sector institutions shall execute their currency buy and sell transactions through the Central Bank of Costa Rica or State-owned commercial banks (...)”.

### Sensitivity Analysis

The table below shows the sensitivity as of June 30, 2015 to an increase or decrease in the foreign exchange rate of the US dollar/colon. ICE Group applies a sensitivity index of 10%, which represents its best estimate of foreign exchange rate variations of the US dollar/colon.

dollars

|   |      |                             |
|---|------|-----------------------------|
| Sensitivity to an increase in the exchange rate:                            |      |                             |
| Net dollar position (expressed in colones) at the exchange rates prevailing | ¢    | 1,541,048,470,000.00        |
| Net dollar position   | US\$ | 2,873,000,000.00            |
| 10% increase in the exchange rate   | ¢    | <u>1,695,153,317,000.00</u> |
| Loss  | ¢    | <u>(154,104,847,000.00)</u> |
| Sensitivity to a disminución in the exchange rate:                          |      |                             |
| Net dollar position (expressed in colones) at the exchange rates prevailing | ¢    | 1,541,048,470,000.00        |
| Net dollar position   | US\$ | 2,873,000,000.00            |
| 10% decrease in the exchange rate   | ¢    | <u>1,386,943,623,000.00</u> |
| Gain  | ¢    | <u>154,104,847,000.00</u>   |

This analysis assumes that all other variables, particularly interest rates and other currencies, remains constant.

## Notes to the Interim Consolidated Financial Statements (In millions of colones)

### Exposure to Interest Rate Risk

ICE Group maintains important assets and liabilities, mainly represented by short-term investments, long term investments, as well as securities payable and notes payable, obtained for financing its commercial operations, which are subject to variations in the interest rates.

With regards to financial assets and liabilities, a detail of the interest rates are included in the following notes:

|                       | <b>Note</b> |
|-----------------------|-------------|
| Securities payable    | 19          |
| Temporary Investments | 8           |
| Notes payable         | 20          |
| Long Term Investments | 6           |
| Effects receivable    | 10          |

### Sensitivity Analysis

In interest rate risk management, ICE Group tries to reduce the impact caused by short-term fluctuations in profits. Regarding short-term investments, long-term investments, as well as securities payable and notes payable, permanent changes in the interest rate would have an impact in profits.

During the year ended June 30, 2015, it is estimated that an overall increase or decrease of one percentage point in interest rates would have caused the following changes in financial assets and liabilities:

|                                  | <b>Effect on income income-expenditure</b> |                        |
|----------------------------------|--|------------------------|
|                                  | <b>At Junio 30, 2015</b>                   |                        |
|                                  | <b>Strengthening of 1%</b>                 | <b>Weakening of 1%</b> |
| <b><u>ICE</u></b>                |  |                        |
| Temporary investments            | 1,282                                      | (1,282)                |
| Long-term financial investments  | 674  | (674)                  |
| Short-term financial investments | -  | -                      |
| Long-term receivables            | 82   | (82)                   |
| Short-term receivables           | 27   | (27)                   |
| Titles payable long-term value   | 10,781                                     | (10,781)               |
| Securities payable short term    | 519  | (519)                  |
| Notes payable Long-term          | 5,943                                      | (5,943)                |

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

## **Note 38. ICE Group's Operating Segments**

The segments are ICE Group's identifiable components that provide related goods and services (business segments), which are subject to different risk and yields from other segments. The business segments are determined based on ICE Group's internal organizational and informational structure.

The segments identified by ICE Group are:: ICE Telecommunications Segment, which includes Telecommunications Sector-ICE, RACSA, CRICSA y Cable Visión and ICE Electricity, which includes the electricity segment ICE and CNFL. These segments provide different products and services, and are separately managed, as they require different technologies and marketing strategies. The following summary describes the operations of each segment to be reported:

| <u>Segment to be reported</u> | <u>Operations</u>   |
|-------------------------------|---|
| Electricity                   | Generation services, transmission and distribution of electric energy nationally, and to a lesser extent, in Central America.   |
| Telecommunications            | Basic telephony services, fixed telephony, mobile services, prepaid, post-paid, mobile Internet, messaging and international services, commuted, dedicated and advanced network Internet, as well as various business services. |

INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

**Note 39. Contingent Assets and Liabilities**

Current judicial proceedings involving ICE Group as of June 30, 2015 are as follows:

| Proceeding  | Nature and Current Status   | Estimated Amount of Lawsuit | As of June 30, 2015    | As of December 31, 2014 |
|---|---|-----------------------------|------------------------|-------------------------|
|   |   |                             | Provision for Lawsuits |                         |
| <b>Contingent Assets - Lawsuits filed by ICE Group:</b> |   |                             |                        |                         |
| Legal Collection  | The Legal Collection area processed the executive proceedings to recover the outstanding debts for the payment of electricity and telephone services .  | 4,582                       | -                      | -                       |
| Arbitration   | ICE awarded Verizon the preparation of the Telephone Directories through a bid. Due to a contractual breach by Verizon, ICE filed a contractual resolution proceeding with an administrative contentious court in 2005 to collect a compensation for damages. As part of this proceeding, ICE requested, as precautionary measures, an attachment of the funds deposited by ICE. However, the Judge ruled that the contentious jurisdiction was incompetent to hear the proceeding because the Agreement entered by ICE and VERIZON contained an arbitration clause. In 2011, ICE filed a prima facie precautionary measure to keep the attachment of the amounts deposited by ICE in 2005, such a precautionary measure is still in force and an ARBITRATION was filed with an arbitration court, and it is taken to the AMCHAM. Current status of the proceeding: "Through resolution by the First Chamber of the Supreme Court of Justice at fourteen hours and twenty-five minutes on January twenty-ninth of two thousand fifteen, an appeal for revocation was filed by the defendant against the resolution by such a Chamber regarding the competence of the Arbitration Tribunal." | 9,717                       | -                      | -                       |
| Ordinary Contentious                                    | Ordinary contentious proceedings in which the plaintiff is asking for an annulment of administrative acts for the collection of penalties, and ICE executed in due course the ruling of the Contentious Court number 173-2013-I which modifies the first instance and dismisses the lawsuit in every respect, and both costs are to be paid by the plaintiff, but it is not final yet. On January 21, 2014, the plaintiff filed a reversal but it was challenged by ICE.  | 991                         | -                      | -                       |
|   | Collection of damages resulting from the agreements and sentences issued by the United States against Alcatel-Lucent, The proceeding is hearing a Reversal Appeal filed by ICE after the Court accepted a previous transaction defense filed by Alcatel and according to which, the payments made by the Government covered the amounts claimed in this proceeding. A proceeding that replaces the proceeding previously filed by the United States claiming the payment of damages resulting from the sentences and agreements of Alcatel in the United States.  | 5,364                       | -                      | -                       |
|   | A lawsuit is filed against the insurance company to recover the investments in the correction of damages caused by a landslide and which were not covered by the policy. The insurance company deposited in court 78% of the total claimed. This was settled in favor of ICE Group in a second instance.  | 1,134                       | -                      | -                       |
| Common Criminal   | Collection of damages, particularly the amount corresponding to alleged surcharges paid by ICE to INS for the premium of the U5000 policies. The preliminary hearing was held from February 2 to April 16, 2015. The topics covered during the hearing are pending to be settled.   | 1,877                       | -                      | -                       |
|   | Criminal case referred to as ICE-Alcatel. The Third Chamber of the Court, settling reversal appeals, annulled the judgment of the Court of Appeals and some reversal appeals that have not been heard before are to be settled and there should be a new hearing of civil matters.  | 8,046                       | -                      | -                       |

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

### Note 40. Laws

#### (a) Law for the Creation of *Instituto Costarricense de Electricidad*

The purpose of this Law was the creation of Instituto Costarricense de Electricidad, hereinafter Instituto, entrusted with the rational development of the physical energy producing sources of the Nation, particularly, hydraulic resources.

The law stipulates that the Instituto shall have legal capacity and full autonomy to be in a better position to fulfill its objectives.

This Law states that as an autonomous institution, the Instituto shall exercise its administrative and technical management entirely independent from the Executive Branch, and exclusively guided by the decisions made by its Board of Directors, which shall act based on its criteria and in compliance with any relevant laws and regulations and technical principles, and shall be responsible for managing it in a comprehensive and inescapable manner.

This Law states that a key duty of ICE, before Costa Ricans, is to channel the use of the hydroelectric energy to strengthen the national economy and foster the greatest wellbeing of the Costa Rican people.

Said Law states that the duties of the *Instituto* are as follows:

- (i) Give a timely and effective solution to the lack of electricity in the Nation, if any, and try to have energy available at all times to meet the normal demand and foster the development of new industries, the use of electricity in rural areas, and a greater domestic consumption.

The main tasks of the *Instituto* shall be aimed at this objective, through the use of all the necessary technical, legal, and financial resources, and its basic work program shall be the construction of new hydroelectric energy plants and distribution networks. This task shall be carried out within the limits of economically justified investments.

- (ii) Join efforts to meet the needs of electric energy, through technical procedures that ensure the highest performance of the energy and its distribution systems.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements

(In millions of colones)

- (iii) Foster the industrial development and the highest production of the country by making a preferential use of electric energy as the driving force and heating source and contribute through advice and technological research to achieving world-class know-how and use of the wealth sources of the country.
- (iv) Ensure a rational use of the natural resources and end the destructive and wasteful use of such resources. It shall particularly try to promote the domestic use of electricity for heating purposes instead of fuels taken from the national forests and imported fuels, and foster the use of wood as an industrial raw material.
- (v) Preserve and defend the hydraulic resources of the country by protecting the watersheds, the river beds and sources, a task that shall have the cooperation of the National Electricity Service and the Ministries of Agriculture and Public Works, through a mutual cooperation program.
- (vi) Contribute to the use of lands for agricultural purposes through irrigation and regulation of rivers, if economically feasible, by comprehensively developing sites to produce electric energy.
- (vii) Make its technical, administrative, and financial procedures become efficiency models that not only ensure the proper functioning of the *Instituto*, but also be a benchmark for other activities performed by Costa Ricans.
- (viii) Ensure the establishment, improvement, extension, and operation of telecommunications networks in a sustainable manner, and provide and market telecommunications, infocommunications, and information goods and services, and other convergent goods and services. The concessions required by ICE and its companies to achieve these objectives shall be subject to the terms, duties, obligations, and other requirements set forth in any applicable laws.

Nevertheless, pursuant to the conditions set forth in the previous paragraph, ICE shall be able to keep the ownership of the concessions granted in its favor and under use during the corresponding legal term.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

### (b) Law of the Regulatory Authority for Public Services

The Law of the Regulatory Authority for Public Services No. 7593, was published in the Official Newspaper *La Gaceta* number 169 of September 5, 1996, which stipulates the transformation of the former National Electricity Service (SNE) into the Regulatory Authority for Public Services (ARESEP).

This Law stipulates that one of the duties of ARESEP is to ensure the compliance with standards of quality, quantity, reliability, opportunity, continuity, and optimal provision of the public services defined by article 5- such as the provision of electric energy services during the generation, transmission, distribution, and commercialization stages.

As a provider of electric energy public services during the generation, transmission, distribution, and commercial stages, ICE shall be subject, among others, to the following relevant obligations:

- (i) Comply with the provisions stipulated by ARESEP regarding the provision of the service.
- (ii) Maintain facilities and equipment in good working order as to avoid damages to people or properties or any interruption of the service.
- (iii) Provide ARESEP with timely information related to the provision of the service and the accounting statements of its operations.
- (iv) Protect, preserve, recover, and use natural resources related to the use of the service in a rational manner.
- (v) Carry out unprofitable activities or investments within its territorial and material purview.
- (vi) Provide the service to whoever requests it without discrimination.
- (vii) Provide the service in the short term in the event of an increased demand.
- (viii) Provide the service under proper conditions with the frequency and safety indicated by its nature, concession, or permit.
- (ix) Provide the service on equal footing and charge a fair price.

Regarding penalizations, ARESEP is authorized to penalize public services providers that perform any of the following activities:

- (i) Charge rates or prices different from those set by ARESEP, or rates not previously set by ARESEP.
- (ii) Poor maintenance of the infrastructure or equipment used to provide the public service, which might put people or property at risk.

(Continues)

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- (iii) Fraudulent use of goods and services to avoid a regulated payment.
- (iv) Unauthorized provision of a service.
- (v) Removal, without an express authorization of the entity that granted the concession or permit, of the equipment or facilities necessary to provide the public service.
- (vi) Failure to comply with the obligation to insure employees with the CCSS and with an occupational hazard regime.
- (vii) Failure to comply with the binding conditions imposed in rate resolutions upon the public services provider.
- (viii) Failure to comply with the quality standards and principles in the provision of the public service, other than an Act of God or force majeure.

On another note, as a service provider ICE is required to pay to the Regulatory Authority for Public Services an annual fee per each regulated activity; such fee is calculated by ARESEP in accordance with the principle of service at cost, including a proper costing system for each regulated activity, in conformity with the provisions set forth in article 82 of Law No. 7593.

#### (c) General Telecommunications Law

The General Telecommunications Law Number 8642 was published in Official Bulletin La Gaceta of June 30, 2008, setting forth the scope and regulation mechanisms for telecommunications, including the use and exploitation of networks and provision of services.

The objectives defined by this Law are:

- Guarantee the right of inhabitants to access telecommunications services, in the terms established in this Law.
- Ensure the application of the principles of universality and solidarity regarding the telecommunications services.
- Strengthen the mechanisms of the principles of universality and solidarity regarding the telecommunications services, guaranteeing access to inhabitants who require them.
- Protect the rights of the telecommunication service users, ensuring efficiency, equality, continuity, quality, larger and better coverage, more and better information, more and better alternatives in the provision of services, as well as guaranteeing the privacy and confidentiality in the communications, according to the Political Constitution of Costa Rica.
- Promote effective competition in the telecommunications market, as a mechanism for increasing availability of services, improving their quality and insuring accessible prices.

### Notes to the Interim Consolidated Financial Statements

*(In millions of colones)*

- Promote the development and use of telecommunications services within the scope of information and knowledge and as a means of support to sectors, such as health, public safety, education, culture, commerce and electronic government.
- Ensure the efficient and effective allocation, use, exploitation, management, and control of the radio electric spectrum and other scarce resources.
- Stimulate investment in the telecom sector using a legal framework that provides mechanisms that guarantee transparency, non-discrimination, equity, and legal stability and that does not promote levying taxes.
- Try for the country to obtain the maximum benefits regarding technological progress and convergence.
- Obtain telecommunications development indexes to similar to those of developed countries.

In addition, this law indicates that concessions will be granted for the use and exploitation of the radio electric spectrum frequencies, as required for the operation and exploitation of telecommunications networks. Said concessions will enable the holder for the operation and exploitation of the network. When the concession relates to public telecom networks, the concession holder is entitled to provide all types of telecom services available to the public. The concession will be awarded for a specific coverage area (regional or national) in order to guarantee the efficient use of the radio spectrum.

This law establishes that the radio spectrum is a public good and the planning, management, and control of its use must be in line with the provisions of the Political Constitution of the Republic of Costa Rica, international treaties, the General Telecommunications Law, the National Telecom Development Plan, the National Frequency Distribution Plan, and other regulations.

Through the procedures set forth in this Law, concessions or authorizations relating to the operation of public telecommunications networks associated with rendering services for basic traditional telephone services cannot be granted. In this case, the legislative special concession referred to in subparagraph 14 of article 121 of the Political Constitution is required. For this process, the winning bids were presented by Claro CR Telecomunicaciones, in the amount of US\$75 million for one concession, and Azules y Platas (Telefónica) for US\$95 million, for another concession.

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

This Law created the national telecommunications fund (Fondo Nacional de Telecomunicaciones – FONATEL) as an instrument for managing the resources allocated to finance compliance with the goals regarding universal access, universal service and solidarity established in this Law, as well as the goals and priorities defined in the National Telecommunications Development Plan. SUTEL is responsible for managing FONATEL's resources.

Other important matters contained in this Law are the following:

- The operators of public networks and providers of telecommunication services available to the public must guarantee the secret of communications, the right to privacy and the protection of the personal information regarding clients and final users, through the implementation of the systems and technical and administrative measures necessary.
- The rates for telecommunication services available to the public are established initially by SUTEL, pursuant to the use of methodology of maximum prices, or any other that promotes competition and efficiency in the use of resources, according to the bases, procedures and periodicity set forth in the regulations.
- Access to and interconnection with public telecom networks is guaranteed in order to ensure efficiency, true competition, optimization in the use of limited resources, and greater benefits for users. Interconnection prices shall be aligned with costs, as prescribed in paragraph 13) of article 6 of this law, and are to be freely negotiated among operators using the procedures established by SUTEL.
- A tax corresponding to SUTEL is established for the Telecommunication Services, which is a single annual regulatory charge determined in conformity with article 59 of Law No. 7593 dated August 9, 1996. This tax will provide the resources necessary for effective management.
- A reserve tax is imposed on the radio-frequency spectrum. That tax is to be paid annually by network operators and telecom service providers with the purpose of planning, managing, and monitoring the use of the radio-frequency spectrum rather than for complying with the objectives of the tax policy. It is collected to finance SUTEL's activities pursuant to articles 7 and 8 of this law.

## INSTITUTO COSTARRICENSE DE ELECTRICIDAD (ICE) AND SUBSIDIARIES

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

- Taxpayers will be the network operators or telecommunication service providers to whom frequency bands within the radio electric spectrum has been assigned, regardless of the use of the band or lack thereof. The amount to be paid for this tax is estimated directly by SUTEL, considering a number of engineering and economic parameters established in the law. This tax is defined by the taxpayer in a tax return issued for periods of one calendar year. The term for filing the tax return and paying the corresponding tax is two months and fifteen days after yearend.
- (d) Law for Strengthening and Modernizing Public Entities in the Telecommunications Sector

The Law for Strengthening and Modernizing Public Entities in the Telecommunications Sector Number 8660 was published in Official Bulletin La Gaceta on August 13<sup>th</sup> of the year 2008, creating through it the Telecommunications Sector and the Telecommunications Superintendence (SUTEL), which will be the entity in charge of regulating, applying, overseeing and controlling the legal framework regarding telecommunications. Additionally, this law prescribes the duties and authority of the Ministry of Science, Technology, and Telecommunications, which Minister will be responsible for directing the sector.

The main objectives of this Law are the following:

- Strengthen, modernize and provide the *Instituto Costarricense de Electricidad* (ICE), its companies and affiliated entities with the legislation that will allow adapting to all the changes in the legal framework regarding generation and rendering of services in the energy sector, as well as telecommunications, information, information products and services, and other converging services.
- Supplement Law Decree Number 449 of April 8, 1949, Regulation for the Creation of *Instituto Costarricense de Electricidad*, and its amendments, to provide ICE with the legal, financial, and administrative conditions necessary to continue providing and marketing products and services within the energy and telecommunication sectors within the national territory and abroad.
- Create the Telecommunications Sector and its regulating entity, as well as developing the rights and functions and powers pertaining to the Sector Minister, who will create the National Telecommunications Development Plan, along with the President of the Republic.

### Notes to the Interim Consolidated Financial Statements

*(In millions of colones)*

- Streamline and expand the mechanisms and procedures concerning public procurement for ICE and its companies.
- Guarantee and ensure the administrative and financial autonomy of ICE and its companies.
- Guarantee accountability and evaluation of results by ICE and its companies.

The Law authorizes ICE to enter into strategic alliances, sell services regarding consultancies, training and any other related product or service, to implement the usual commercial practices, create promotions, including the provision of terminal equipment (free of charge or not), discounts, sponsoring, service packages, among others.

ICE may enter into contracts for the creation of trusts of any nature, within the country or abroad.

It states that when ICE and its companies act as carriers or providers for in the national competitive markets for telecommunication or energy services and products, it shall be subject to the payment of income and sales tax. Payment of income tax is excluded for income resulting from basic traditional telephone service.

It is established that neither the State nor its institutions may impose financial restrictions or limitations to ICE and its companies investments and debts not contained in the Law, nor may they request or demand transfers, purchase of bonds. In general terms, ICE and its companies cannot be compelled to keep deposits in checking accounts or in Government securities.

ICE is entitled to negotiate, contract and enforce, autonomously, medium and long term internal and external debt up to an indebtedness level of 45% with regards to its total assets. Indebtedness will be calculated based on the consolidated total of the value of ICE's total assets and its companies as of December 31 of the previous year. In the event that ICE requires increasing its debt in a higher percentage than the one stated above, it shall present its additional financing requirements for approval from the Executive Branch of the Government of Costa Rica.

Additionally, it may issue all types of securities, in domestic or foreign currency, with the interest and amortization rate, and amount the Board determines appropriate, under the terms of the applicable laws. Said securities shall have the guarantee that ICE and its companies appoint in the issuance agreement. For this, it may securitize its current and future income or its property, through financial contracts, such as leases or trusts, or may burden its properties or income.

Notes to the Interim Consolidated Financial Statements  
(In millions of colones)

ICE and its companies will have a Corporate Acquisition Board, whose goal shall be enforcing the corresponding administrative procurement procedures, including awarding bids and contestations.

(e) Law for the Transfer of Telecommunications to ICE and the Partnering of ICE with RACSA

This Law stipulates that *Instituto Costarricense de Electricidad* shall provide, upon the enactment of this law, the telecommunications services set forth in Law N° 47 of July 25, 1921, for an indefinite period of time in accordance with the terms and conditions set forth therein.

Through this law, *Instituto Costarricense de Electricidad* is authorized to organize a corporation that shall be referred to as *Compañía Radiográfica Costarricense Sociedad Anónima (RACSA)*, in combination with *Compañía Radiográfica Internacional de Costa Rica (CRICSA)*, in order to provide telecommunications services during a thirteen-year term.

In accordance with the regulations of this law, the capital stock shall be held 50% by ICE and the remaining 50% by *Compañía Radiográfica Internacional de Costa Rica*. By mutual consent, on November 29, 1975, RACSA acquired the entirety of the shares of CRICSA, which were later sold to ICE; therefore, ICE became the sole stockholder of RACSA. Since ICE held 50 % of the shares of RACSA, ICE became the sole holder of 100% of the shares of *Radiográfica Costarricense, S.A. (RACSA)*.

In 1977, the Legislative Assembly extended the concession to RACSA for the provision of telecommunications for another ten years. Once again in 1985, the concession was extended for another ten years as of 1988. In 1992, the Legislative Assembly, through Law No.7298, extended the corporate term of RACSA for another 25 years. Finally, through Law No. 8660 published in the Official Newspaper *La Gaceta* No. 156 of August 13, 2008, the Legislative Assembly stipulated that the corporate term of *Radiográfica Costarricense Sociedad Anónima* is ninety-nine (99) years as of the entry into force of this Law.

(f) Electricity Agreement

*Compañía Nacional de Fuerza y Luz CNFL* was created through Agreement-Law number 2 of April 8, 1941, referred to as the Electricity Agreement of 1941, which authorized the merger of the Costa Rica Electric Light and Traction Company, Limited, *Compañía Nacional de Electricidad*, and *Compañía Nacional Hidroeléctrica* (or

### Notes to the Interim Consolidated Financial Statements (In millions of colones)

Compañía Electrónica) into Compañía Nacional de Fuerza y Luz, and which was legally organized on May 15, 1941.

Through Law No. 4197 of September 20, 1968, the Government authorizes the acquisition of the shares of CNFL by ICE and amends the Electricity Agreement and the Law for the Creation of ICE. It is currently organized as a corporation.

Through Law No. 8660 published in the Official Newspaper *La Gaceta* No. 156 of August 13, 2008, the Legislative Assembly stipulated that the corporate term of Compañía Nacional de Fuerza y Luz, is ninety-nine (99) years as of the entry into force of this Law.

#### **Note 41.      Subsequent Events:**

*a)      ALCATEL indemnified ICE for damages*

On July 30, 2015, a deposit amounting to US\$7,8 million was received, for a payment made by Alcatel-Lucent to ICE to make up the amount that was established through an out-of-court agreement that settled the issues related to the legal proceedings number 04- 006835-0647-PE; 08-000602-1027-CA and 12-002154-1027-CA, between ICE and Alcatel.

*b)      Exercise of purchase option of Peñas Blancas lease*

On June 30, 2015, a purchase option was exercised pursuant to the lease agreement entered into by and between ICE and Banco Nacional de Costa Rica in the amount of US\$19 million, which were paid in July 2015, for the acquisition of Peñas Blancas Hydroelectric Plant under a Trust.
